**DELETIONS**  
**ADDITIONS****CITATION    HEADING**

CITATION    Narrative Text. Citation

**NEW**            **New text, policy, or action.**CITATION    ***Policy Element Abbreviation-Section Number.Policy Number: Policy Name***CITATION    *Action Element Abbreviation-Section Number.Action Letter: Action Name*Completed Action Text (at end of action and before citation): **Completed – See Implementation Table.****300            OVERVIEW 300**

300.1            The Land Use Element is the cornerstone of the Comprehensive Plan. It establishes the basic policies guiding the physical form of the city, and provides direction on a range of development, ~~conservation,~~ **preservation,** and land use compatibility issues. The Element describes the ~~balancing of priorities that must take place in order to~~ **range of considerations involved in** accommodating a multiplicity of land uses within ~~the boundaries of the District of Columbia-~~ **Washington, DC.** 300.1

300.2            The critical land use issues ~~facing the District of Columbia-~~ are addressed in this element. These include:

- ~~Promoting neighborhood conservation~~
- **Providing adequate housing, particularly affordable housing**
- **Conserving, C**reating and maintaining ~~successful~~ **inclusive** neighborhoods, **accessibility, and diversity, while allowing new growth**
- Strengthening Downtown
- Enhancing neighborhood commercial districts and centers
- Balancing competing demands for finite land resources
- Directing growth and new development to achieve economic vitality **and creating jobs** while minimizing adverse impacts on residential areas and open space
- **Promoting transit-accessible, sustainable development**
- **Improving resilience**
- Siting challenging land uses 300.2

## Draft Amendments

300.3 More than any other part of the Comprehensive Plan, this Element lays out the policies through which ~~the city will accommodate~~ growth and change occur, while conserving and enhancing ~~its~~ neighborhoods, commercial districts, and other areas. Because the Land Use Element integrates, and to some degree balances, the policies and objectives of all the other District Elements, ~~it should be given greater weight than the other elements~~ as competing policies in different elements are balanced. 300.3

300.4 Although the District of Columbia was almost fully developed by 1960, the demand for land for housing and jobs has continued to fuel land use change. The changing needs of the federal government, private industry, and ~~the city's~~ institutions ~~still~~ continually reshape the landscape, ~~on a daily basis~~. ~~The city's~~ Aging, environmentally-inefficient, and underutilized building stock ~~still~~ requires refurbishment and replacement. The renewed popularity of urban city living generates the need for more housing and new amenities. 300.4

300.5 Land use changes have the potential to make Washington, DC ~~the city~~ more vibrant, economically healthy, exciting, and even more environmentally sustainable and resilient than it is today. But without proper direction and coordinated public investment, change can also be adverse. The Land Use Element strives for positive outcomes in all parts of the city by setting policies on appropriate uses and densities, and describing how different uses can successfully co-exist. 300.5

**NEW** The built environment and natural features of the city can protect against the acute shocks and reduce the chronic stresses facing the District; conversely, without proper planning or maintenance, the built environment and natural features can make communities vulnerable to these shocks and stresses. The Land Use Element addresses the provision, protection, and enhancement of physical assets and critical facilities including housing, infrastructure and transportation systems, and its natural, historic, and cultural resources to become a truly resilient city. The vulnerability of buildings, infrastructure, and ecosystems to the adverse effects of climate change is expected to increase due to more days with high temperatures, more flooding caused by heavy rainfall and rising sea levels, and more economic disruption from extreme weather events.

300.6 The Element is divided into several sections. The first section provides basic data on land use and density in the District of Columbia. Subsequent sections of the element present policies and actions, organized under the following major topic headings:

- Shaping the City
- Creating and Maintaining Successful Neighborhoods
- Balancing Competing Demands for Land. 300.6

## Draft Amendments

The definitions of Land Use categories and description of the Future Land Use Map and Generalized Policies Map may be found in Chapter 2 (Framework Element).

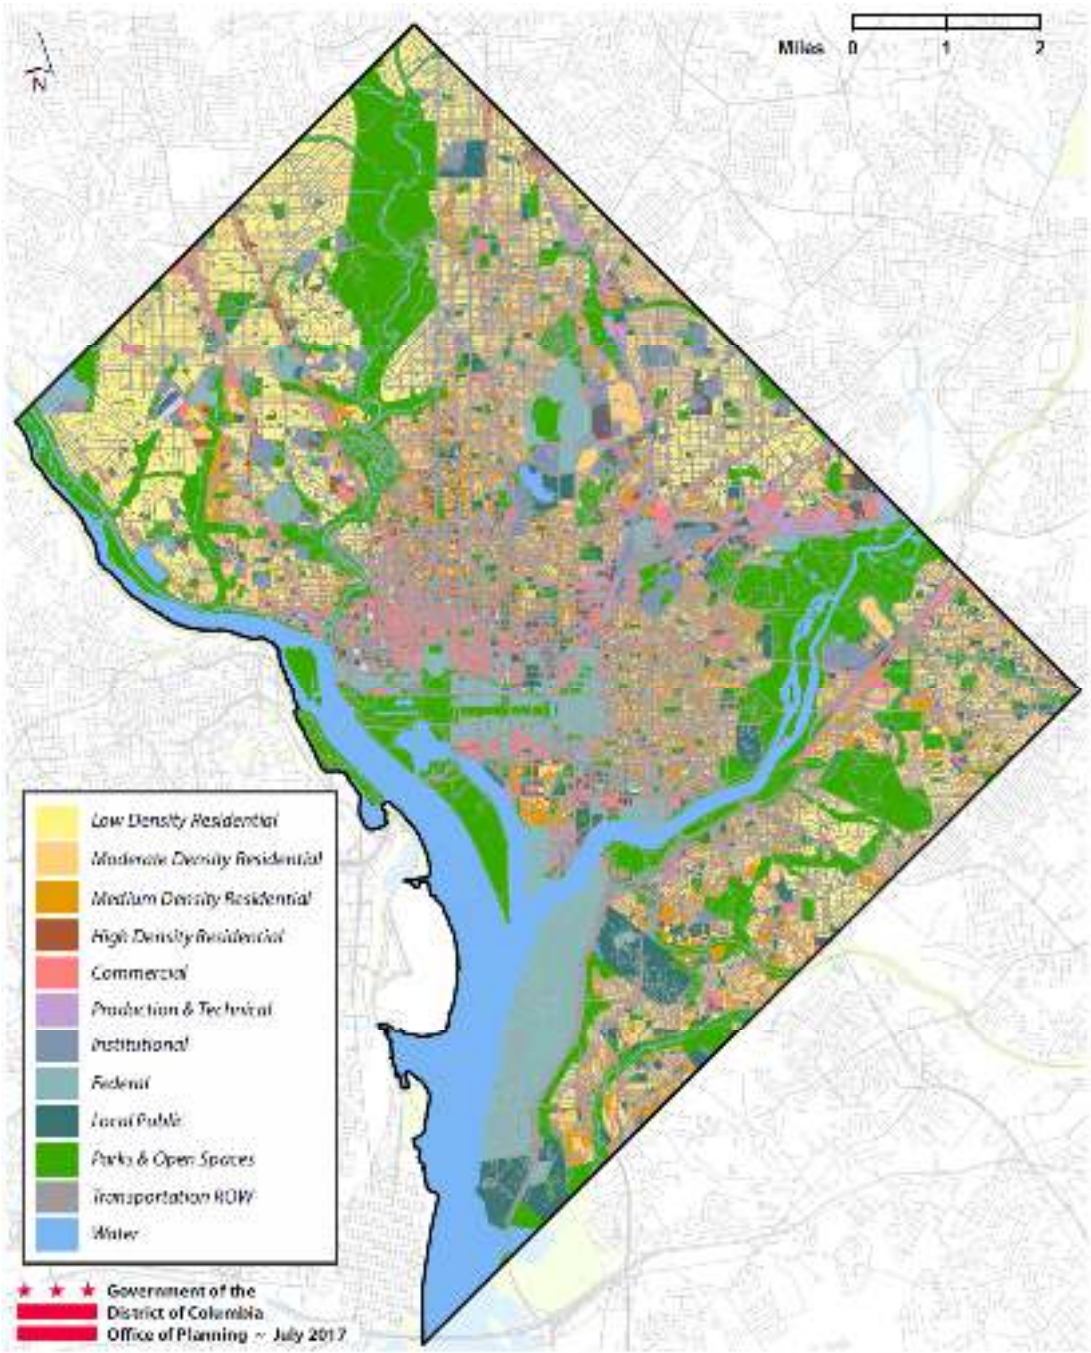

### 301 LAND USE PROFILE OF THE DISTRICT OF COLUMBIA 301

301.1 The District of Columbia comprises 69 square miles, including approximately eight square miles of water and 61 square miles of land. Land use patterns, illustrated in Map 3.1, reveal an expansive city “core” of about four square miles centered around the open spaces of the federal city. The core is surrounded by an inner ring of moderate to high density residential and mixed use neighborhoods, extending west to Georgetown, north to Columbia Heights and Petworth, east across Capitol Hill, and south to the Anacostia River and Near Southwest. Beyond the inner ring is an outer ring of less dense development, characterized largely by single family housing and garden apartments. The two rings generally correspond to historic development patterns, with most of the inner ring developed ~~prior to 1910~~ by about 1920 and the outer ring developed after ~~1910~~ about 1920. 301.1

301.2 The impact of the city’s transportation network on land use patterns is apparent in Map 3.1. Most of the commercial and higher density development beyond the core of the city hugs radial avenues like Connecticut Avenue NW and Pennsylvania Avenue SE. Most of the District’s industrial development follows the railroad corridors running from Union Station east along New York Avenue and north to Silver Spring. The historic connection between transportation and land use continues to shape the city today, with Metrorail station areas being ~~emerging as~~ the most robust ~~city’s newest~~ activity centers. 301.2

Draft Amendments

301.3 Map 3.1: Existing Land Use ~~2005~~2017

## Draft Amendments

~~301.4 Table 3.1: Acres of Existing Land Use by Planning Area, 2005~~

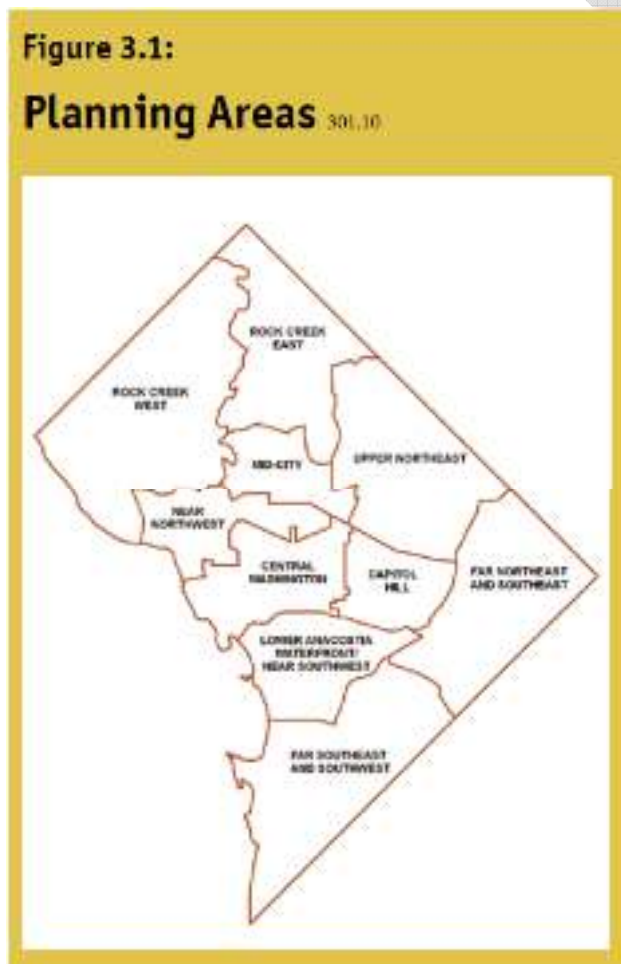

- 301.5 Map 3.1 reveals other distinctive land use patterns. ~~The city's~~ Open space networks, particularly those along Rock Creek and the Potomac and Anacostia Rivers, are apparent. Large institutional uses—including some 2,000 acres of colleges, universities, hospitals, seminaries, and similar uses ~~across the city~~ are visible. Federal enclaves beyond the core of the city, such as Joint Base Anacostia-Bolling ~~Air Force Base~~, the St. Elizabeths Hospital West Campus, ~~Walter Reed Hospital~~, and the Armed Forces Retirement Home, appear prominently. Many of the federal and institutional uses are located in areas that are otherwise residential in character. While this creates the potential for land use conflicts, these uses are also important open space buffers, job centers, community anchors, and resources for the surrounding neighborhoods. 301.5
- 301.6 Table 3.1 indicates the existing acreage in different land uses in each of the ~~city's~~ ten Planning Areas. Figure 3.1 shows the location of these Planning Areas. The table shows both similarities and differences between Areas. ~~Both the “inner ring” and “outer ring” neighborhoods generally contain 30 to 40 percent of their land areas in residential uses.~~ On the other hand, residential uses represent less than two percent of Central Washington and less than 10 percent of the Anacostia Waterfront. About 27 percent of the District consists of road rights-of-way, although only about 60% ~~half~~ of this acreage actually consists of the paved streets themselves. For instance, road rights of way constitute 40 percent of Capitol Hill, but most of this land consists of landscaped or bricked front “yards” along streets with exceptionally wide rights-of-way. 301.6
- 301.7 Despite the significant number of jobs in the city, commercial uses represent less than five percent of the city's land area, and industrial uses represent ~~just~~ less than one percent. Commercial uses represent about ~~16~~ 14 percent of the land area in Central Washington, but less than two percent of the land area in Far Southeast/ Southwest. Many of the District's jobs are associated with federal facilities and institutional uses, which together make up about ~~13~~ 10 percent of its land area. Institutional lands appear throughout the city, but are especially prevalent in the three Northwest Planning Areas and in Upper Northeast. 301.7
- 301.8 Maps 3.2 and 3.3 show estimated population and employment density in the city and close-in suburbs as of ~~2005~~ 2017. The data is based on the traffic analysis zones used by the Metropolitan Washington Council of Governments for transportation modeling. Map 3.2 again illustrates the “ring” of fairly dense neighborhoods around the city center, and the denser residential development along major corridors like Connecticut Avenue NW and 14<sup>th</sup> Street NW. It also shows areas of fairly dense development east of the Anacostia River, primarily associated with large low- rise garden apartment complexes in Far Southeast. On the other hand, areas like Woodridge, Burrville, and Shepherd Park have low

## Draft Amendments

population densities, in some cases even lower than the adjacent neighborhoods in suburban Maryland. **The contrast is especially stark with the intense residential and commercial development of Silver Spring.** 301.8

301.9 Map 3.3 shows that employment is highly concentrated in Central Washington. ~~Nearly 60 percent of the city's jobs are located within this area.~~ Beyond the city center, other major employment centers include the universities and federal enclaves, the New York Avenue ~~industrial~~ corridor, the West End, the Georgetown waterfront, **the Near Southeast/baseball stadium area** and several corridors in Upper Northwest. Large concentrations of employment also appear beyond the city limits, in Downtown Bethesda and Silver Spring, **Maryland** and in Rosslyn, Crystal City, the Pentagon area, and Alexandria, **Virginia**. 301.9

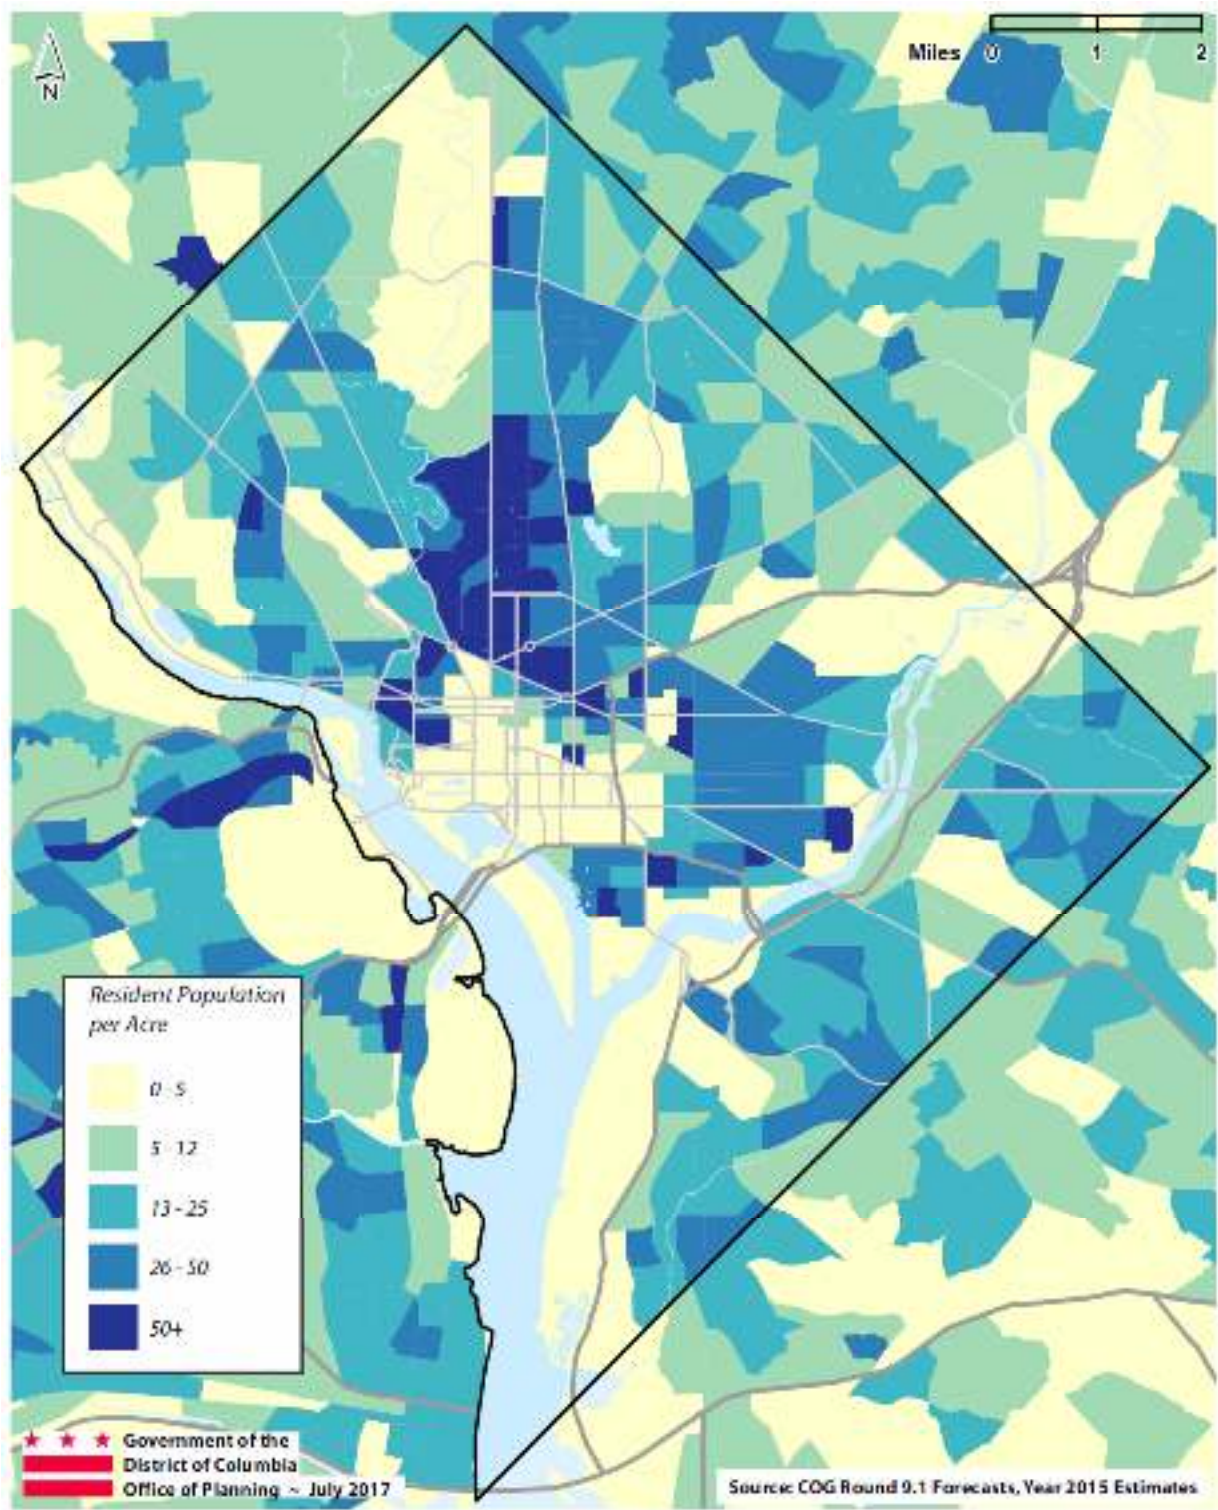

301.10 Figure 3.1: Planning Areas

Draft Amendments

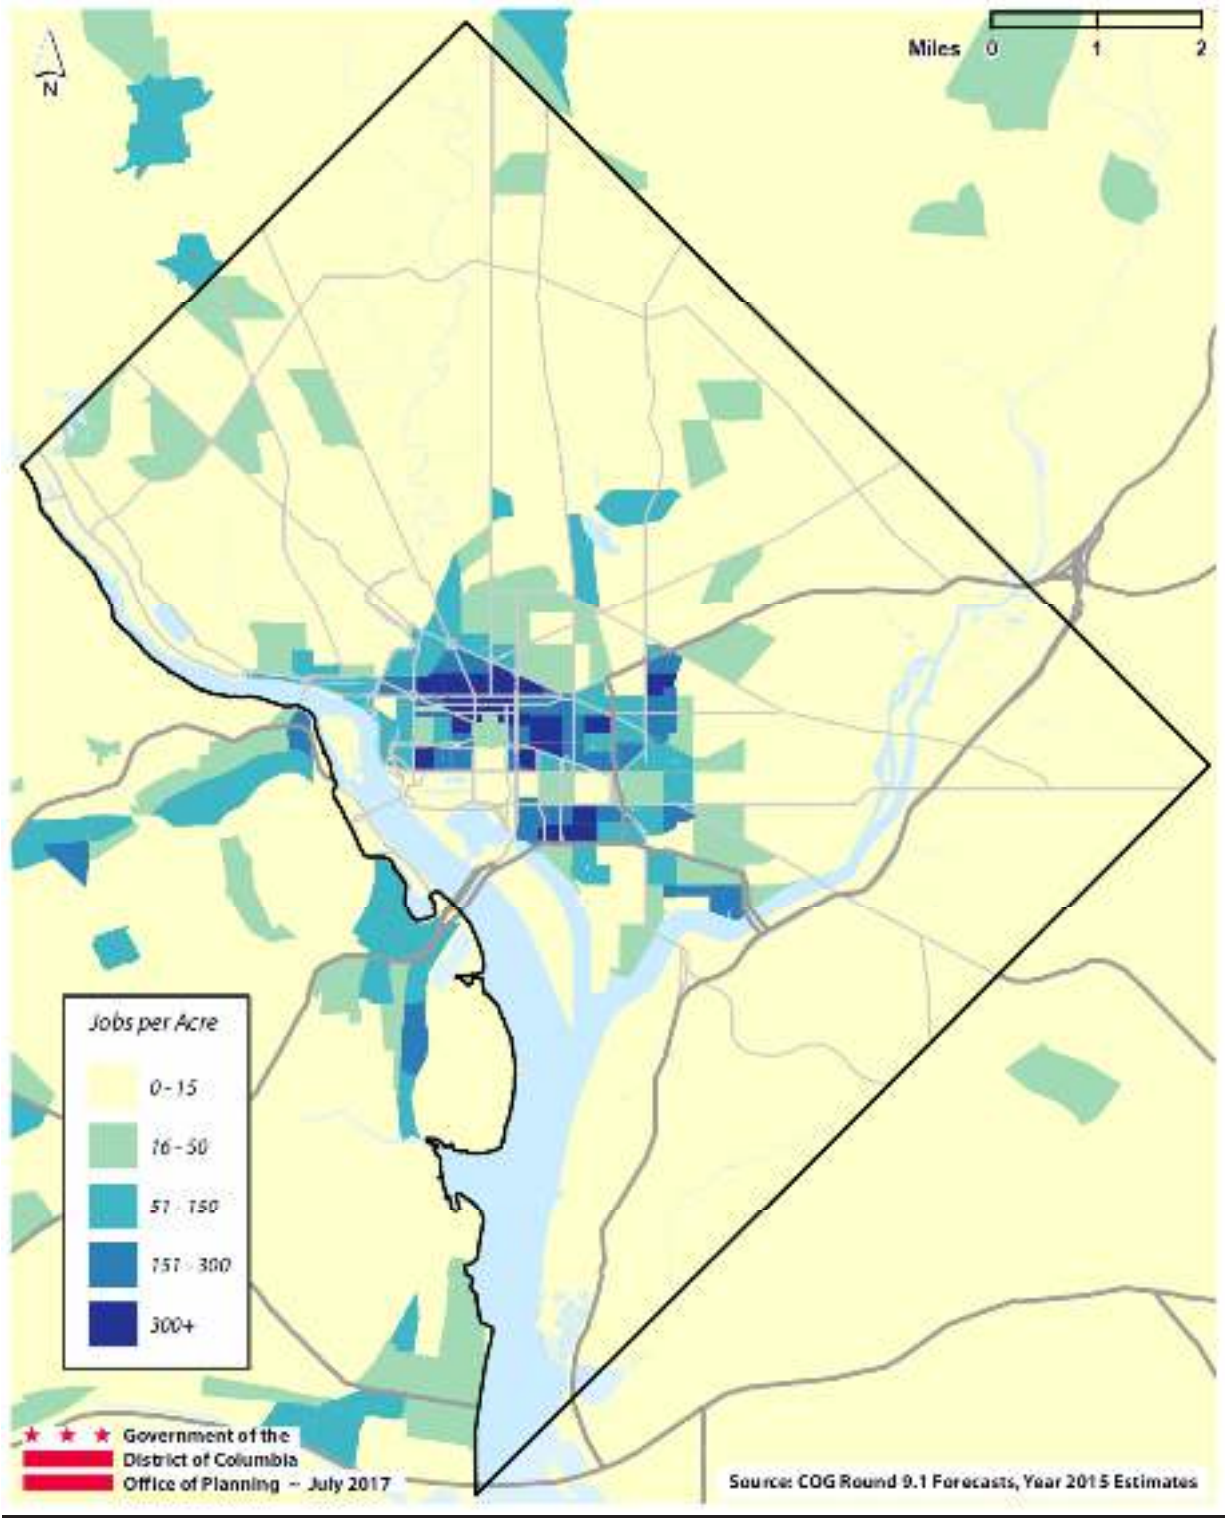

301.11 Map 3.2: Population Density 2017

Draft Amendments

301.12 Map 3.3: Employment Density 2017

## Draft Amendments

**302 LAND USE GOAL 302**

- 302.1 The Land Use Goal is:  
 Ensure the efficient use of land resources to meet long-term neighborhood, citywide, and regional needs; to help foster other District goals; to protect the health, safety, and welfare of District residents, institutions, and businesses; to sustain, restore, or improve the character, ~~and stability,~~ affordability, and equity of neighborhoods in all parts of the city; to provide for additional housing and employment opportunities, and to effectively balance the competing demands for land to support a growing population and the many activities that take place within Washington, DC's ~~District~~ boundaries. 302.1

**303 LU-1 SHAPING THE CITY 303**

- 303.1 This section of the Land Use Element describes the desired pattern of growth and development in the District of Columbia ~~over the next 20 years.~~ Its focus is on the specific areas or types of areas ~~within the city~~ where change is most likely to take place. The section begins with a discussion on supporting growth and guiding policies for the ~~center of the~~ city. It then turns to the large sites ~~around Washington~~ where ~~future~~ changes are envisioned. This is followed by a discussion of the opportunities for change along the ~~city's~~ corridors and ~~around its~~ transit station areas. Policies for neighborhood infill development also are included. 303.1

**NEW SUPPORTING GROWTH**

- NEW** Washington, DC has been experiencing a shift in growth over the past decade. This growth has occurred in a variety of forms: land development, income, economic strength, population, and innovation. Previous planning efforts focused on retaining residents and attracting growth to strengthen the economy. Since the Comprehensive Plan was developed in 2006, the District's population grew almost 20 percent and is anticipated to reach approximately one million residents after 2045. The continued interest in living and working in the District requires a shift in planning efforts to support such growth and the challenges it brings. The needs and desires of a fast-growing District in the 21<sup>st</sup> century are different and the approach to how growth is supported reflects that difference.

- NEW** The Comprehensive Plan's companion document, "A Vision for an Inclusive City," sets forth the District's desire to employ the highest and best use of its land for the benefit of all residents. Supporting growth through an equity lens provides opportunities for understanding that vulnerable populations and neighborhoods need additional attention to share in the prosperity of the District. Vulnerable and underserved communities suffer from high and rising housing costs, persistent

## Draft Amendments

unemployment, worse health than their affluent peers, and potential displacement. There are economic disparities in area throughout the District.

NEW

Adding a supporting growth lens places a different emphasis on development guidance and expectations. Growth cannot be ignored, as it is necessary for continued prosperity and revenues to provide for social supports and municipal services. A change in the Future Land Use Map designations can have impacts on the value of the designated and neighboring properties, the capacity of the infrastructure and civic services, as well as the short- and long-term expectations of development. Previous benefits and amenities used to catalyze growth are now necessities for supporting growth: affordable housing, transportation improvements, infrastructure improvements, open space development and maintenance, sustainable and resilient design, and arts and culture.

NEW

Innovations such as autonomous vehicles, smart cities, sustainable infrastructure, and technology will shape growth. The change in retail from brick and mortar businesses to online platforms and the increasingly prevalent use of automation across sectors are recent examples of why we need to continuously monitor and adjust our understandings of our city and respond to change.

NEW*Policy: Future Analysis Areas*

Areas of large tracts and corridors where future analysis is anticipated to ensure adequate planning for inclusive growth and climate resilience. Boundaries shown are for illustrative purposes. Final boundaries will be determined as part of the future analysis process for each area.

In certain locations, planning efforts will be undertaken to analyze land use and policy impacts and ways to capitalize, mitigate, and incorporate the anticipated growth. Current infrastructure and utility capacity should be evaluated against full build out and projected population growth. The planning process will target issues most relevant to the community that can be effectively addressed through neighborhood planning. Planning Analyses generally establish guiding documents such as Small Area Plans, Development Frameworks, Retail Strategies, or Design Guidelines. Areas anticipated for future planning analysis include:

- New York Avenue NE corridor
- Upper Wisconsin Avenue NW corridor
- Poplar Point
- Congress Heights
- North Capitol Crossroads – Armed Forces Retirement Home
- RFK Stadium

## Draft Amendments

For areas within the 100 and 500-year floodplain, future planning efforts are anticipated to ensure resilience to flooding for new development and infrastructure projects, including public capital projects. Future analysis for these areas will focus on watershed resilience to encourage the implementation of neighborhood-scale, as well as site-specific solutions, design guidelines and policies for a climate adaptive and resilient city. Watershed resilience analysis areas include:

- Georgetown
- Federal Triangle
- Hains Point
- Southwest Waterfront
- RFK
- Watts Branch
- Poplar Point

**NEW****Policy: Resilience and Land Use**

Implement citywide, neighborhood-scale, and site-specific solutions for a climate adaptive and resilient city.

**NEW****Action: Resilience Equity and Land Use**

Develop projects that decrease the vulnerability of people and places to climate risks.

**304****LU-1.1 STRENGTHENING THE CORE 304****304.1**

Key to the Comprehensive Plan is the transformation of the city's core (generally referred to throughout the Plan as "Central Washington") into a ~~more cohesive~~ **lively** urban center. The Central Business District and the Central Employment Area may overlap with Central Washington but are not the total planning area. The ~~six or seven~~ distinct commercial districts that make up Central Washington already comprise one of the third largest central business districts in the United States, ~~after New York and Chicago~~. Yet, with a few notable exceptions, much of the area lacks the dynamic "24/7" character that defines other great world capitals. ~~For more than 35 years,~~ **For decades** Washington's planners ~~have~~ aspired to create a "living downtown"—a place alive with housing, theaters, department stores, and restaurants as well as the vast expanse of office space that defines the central city today. ~~Recent~~ **New neighborhoods such as the area** ~~developments~~ around Gallery Place, ~~and the~~ Penn Quarter, **NoMa, and Center City have been developed with a mix of uses and physical barriers such as the Center Leg Freeway and Union Station open railyard are being bridged over with mixed-use developments that will reconnect the city.** ~~show that t~~ These efforts are ~~finally~~ paying off, but the area

## Draft Amendments

has even more potential for lively mixed-use, transit-friendly developments, and easy and safe connectivity among neighborhoods. ~~'s full potential has yet to be realized.~~ 304.1

304.2 Between 2005 and 2025, approximately 30 percent of the District of Columbia's ~~future~~ housing growth and 70 percent of its job growth occurred and will occur within the urban core of the city and adjacent close-in areas along the Anacostia River. After 2025, growth is anticipated to occur throughout the city, including outside of the urban core. This growth must be accommodated in a way that ~~protects~~ respects the area's historic ~~texture~~ character, including the ~~street and open space frameworks~~ civic vistas and monumental spaces established by the ~~L'Enfant and McMillan Plans~~ Plan of the City of Washington, ~~the 1910 height limit~~, and the ~~vistas and monumental spaces that define the central city~~ concentration of architectural landmarks downtown. Infill and redevelopment will take place within the established business districts west of 5<sup>th</sup> Street NW, but a majority of the central city's future growth will be achieved through redevelopment of areas on its east side. 304.2

304.3 NoMa and Capitol Riverfront ~~Two areas~~, each over 300 acres in size, ~~are already emerging as the new frontiers~~ have expanded for central city growth. The first includes land in the triangle bounded by New York Avenue, Massachusetts Avenue NW, and the CSX railroad, along with adjacent lands around the New York Avenue Metro station. The second area includes the South Capitol corridor and Near Southeast, including the site of the Washington Nationals Baseball Park and the adjoining ~~Southeast Federal Center~~ Yards project and waterfront area. Whereas much of Central Washington was redeveloped with single-purpose (office) uses during the second half of the 20<sup>th</sup> century, ~~these two areas are envisioned~~ development in the past decade has been focused on a walkable and as mixed use ~~centers~~ environment, including housing, ~~as well as~~ employment, and recreation with an emphasis on modes of transportation other than the individual automobile. ~~These areas represent the most promising setting in the entire region to accommodate Metropolitan Washington's next generation of urban living.~~ 304.3

304.4 As the urban core expands, reinvestment in established business districts such as the Golden Triangle, the Downtown Core, and the Near Southwest also ~~must~~ continue. These areas ~~will be~~ are being modernized, better connected to one another, and developed with new infill uses and public improvements. ~~Large sites~~ Areas such as the Florida Avenue Market and Rhode Island Avenue, NE Old Convention Center provide opportunities for ~~spectacular new civic focal points~~ revitalization and re-envisioning how people work and live in the city, while smaller sites present the opportunity for new retail, housing, and office development. 304.4

## Draft Amendments

304.5 Additional discussions of planning issues in these areas may be found in the Central Washington Area Element, the Upper Northeast Area Element, and the Lower Anacostia Waterfront/ Near Southwest Area Element. These chapters should be consulted for specific policies and actions. 304.5

304.6 ***Policy LU-1.1.1: Sustaining a Strong City Center***

Provide for the continued vitality of Central Washington as a thriving business, government, retail, financial, hospitality, cultural, and residential center. Promote continued reinvestment in central city buildings, infrastructure, and public spaces; continued preservation and restoration of historic resources; and continued efforts to create safe, attractive, and pedestrian-friendly environments. 304.6

304.7 ~~***Policy LU-1.1.2: “Greater” Downtown***~~

~~Promote the perception of Downtown Washington as a series of connected business districts, including Metro Center/Retail Core, Golden Triangle/K-Street, Federal Triangle, Northwest Rectangle, Gallery Place/Penn Quarter, Downtown East/Judiciary Square, Mount Vernon District, NoMA, Near Southwest/L’Enfant Plaza, South Capitol, and the Southeast Federal Center. The traditional definition of Downtown (roughly bounded by 16<sup>th</sup> Street, the National Mall, and Massachusetts Avenue) does not fully convey the geographic extent of Washington’s Central Business District, or the many unique activities it supports. 304.7~~

304.8 ***Policy LU-1.1.3: Central Employment Area***

Continue the joint federal/District designation of a “Central Employment Area” (CEA) within the District of Columbia. The CEA shall include existing “core” federal facilities such as the US Capitol Building, the White House, and the Supreme Court, and most of the legislative, judicial, and executive administrative headquarters of the United States Government. Additionally, the CEA shall include the greatest concentration of the city’s private office development, and higher density mixed land uses, including commercial/retail, hotel, residential, and entertainment uses. Given federally-imposed height limits, the scarcity of vacant land in the core of the city, and the importance of ~~protecting~~ respecting historic resources, the CEA may include additional land necessary to support economic growth and federal expansion. The CEA may be used to guide the District’s economic development initiatives, and may be incorporated in its planning and building standards (for example, parking requirements) to reinforce urban character. The CEA is also important because it is part of the “point system” used by the General Services Administration to establish federal leases. The boundaries of the CEA are shown in Figure 3.2. 304.8

## Draft Amendments

304.9

*Policy LU-1.1.4: Appropriate Uses in the CEA*

Uses of ~~Ensure that~~ land within the Central Employment Area should ~~is used in a manner which~~ reflects the area's national importance, its historic and cultural significance, and its role as the center of the metropolitan region. Federal siting guidelines and District zoning regulations should promote the use of this area with high-value land uses that enhance its image as the seat of the national government and the center of the District of Columbia, and that make the most efficient possible use of its transportation facilities. An improved balance in the mix of uses will help to achieve Washington, DC aspiration for an even larger "living downtown." 304.9

Draft Amendments

304.10 Figure 3.2: Central Employment Area Map

## Draft Amendments

304.11 ***Policy LU-1.1.5: Urban Mixed Use Neighborhoods***

Encourage new central city mixed use neighborhoods combining high-density residential, office, retail, cultural, and open space uses in the following areas:

1. Mt Vernon Triangle;
2. North of Massachusetts Avenue (NoMA);
3. Downtown East and Pennsylvania Avenue;
4. ~~South Capitol Street corridor/Stadium area~~ Buzzard Point/National Park/Audi Field;
5. Near Southeast//Navy Yard;
6. ~~Center Leg Freeway air rights~~ Capitol Crossing (neighborhood between Capitol Hill and Gallery Place); and
7. Union Station air rights; and
8. Near Southwest/Wharf/L'Enfant Plaza Metro Area.

The location of these areas is shown in the Central Washington, Downtown East, and Lower Anacostia Waterfront/Near Southwest Area Elements. Land use regulations and design standards for these areas should ~~require~~ ensure that they are developed as attractive pedestrian-oriented neighborhoods, with high-quality architecture and public spaces. Housing, including affordable housing, is particularly encouraged and should be a vital component of the future land use mix. 304.11

304.12 ***Policy LU-1.1.6: Central Employment Area Historic Resources***

Preserve the scale and character of the Central Employment Area's historic resources, including historic landmarks and districts and the features of the Plan of the City of Washington. ~~the streets, vistas, and public spaces of the L'Enfant and McMillan Plans as well as individual historic structures and sites.~~ Future development must be sensitive to the area's historic character and should enhance important reminders of Washington, DC's ~~the city's~~ past. 304.12

Please consult the Historic Preservation and Urban Design Elements for related policies.

304.13 ***Policy LU-1.1.7: Central Employment Area Edges***

Support the retention of the established residential neighborhoods adjacent to the Central Employment Area. Appropriate building setbacks, lot coverage standards, and ~~a stepping-down~~ transitions in land use intensity and building height are needed ~~shall be required~~ along the edges of the CEA to ~~protect~~ respect the integrity and historic scale of adjacent neighborhoods and to ~~avoid creating sharp visual distinctions between existing and new structures~~ establish a compatible relationship between new structures and the existing neighborhood fabric. 304.13

## Draft Amendments

Please refer to the Urban Design Element for additional guidance on the appropriate transition of intensity at the edges of Downtown.

304.13a ***Policy LU-1.1.8 Reconnecting the City through Air Rights***

Support the development of air rights over rail tracks and highways. In several parts of the central city, there is the potential to build over existing railway tracks and highways. These undeveloped air rights are the result of the interjection of massive transportation infrastructure after the establishment and development of the original city. The tracks and highways have created gaps in the historic urban fabric that have left large areas of the center city divided and difficult to traverse. With substantial investment, these sites represent opportunities for development of housing, retail, and commercial buildings, and for the reconnection of neighborhoods and the street grid.

Where possible, streets should be reconnected and air-rights development should be constructed at and measured from grade level consistent with adjacent land. When development at grade level is not physically possible, air rights should be measured by a means that provides for density and height commensurate with the zone district. Establishment of a measuring point for any particular air-rights development shall be consistent with An Act To regulate the height of buildings in the District of Columbia, approved June 1, 1910 (36 Stat. 452; D.C. Official Code § 6-601.01 et seq.) (“Height Act”), and should not be taken as precedent for other development projects in the city. Densities and heights should be sensitive to the surrounding neighborhoods and developments and be sufficient to induce the investment needed for such construction. 304.13

**NEW** ***Policy LU-1.1.9: New Waterfront Development***

**New waterfront development must actively address flood risk and incorporate adaptive siting and design measures.**

**NEW** ***Policy LU-1.1.10: Public Space Design***

**Encourage design of parks, wetlands, open space, natural cover, and rights-of-way that can withstand a 100-year flood event or stricter standards as prescribed by District law while improving quality of life in neighborhoods.**

304.14 ***Action LU-1.1.A: Central Employment Area Boundary***

**Renew request to** **Encourage** the National Capital Planning Commission to amend the boundary of the CEA depicted in the Federal Elements to match the boundary shown in the District Elements of the Comprehensive Plan. 304.14

## Draft Amendments

304.15 ***Action LU-1.1.B: ~~Downtown~~ Center City Action Agenda***

Update the ~~2000 Downtown Action Agenda~~ **2008 Center City Action Agenda** to reflect changing conditions, priorities, and projections (the Agenda is Downtown's strategic plan for future growth, improvement, and conservation). The revised Agenda should define Downtown more broadly to include the multiple business districts that comprise the Central Employment Area. 304.15 More specific policies for this area are contained in the Central Washington Area Element and the Lower Anacostia Waterfront/Near Southwest Area Element.

304.16 ***Action LU-1.1.C: Development of Air Rights***

Analyze the unique characteristics of the air rights development sites within **Washington, DC** ~~the District~~. **Development sites should address the growing need for housing and affordable housing, reconnect the L'Enfant grid, and enhance mobility.** ~~Determine appropriate zoning and means of measuring height for each unique site consistent with the Height Act, taking into consideration the ability to utilize zone densities, the size of the site, and the relationship of the potential development to the existing character of the surrounding areas.~~ 304.16

**NEW*****Action LU-1.2.D: Development on Former Federal Sites***

**When Downtown sites shift from federal to private or local use, employ planning and zoning approaches that provide for the integration of the sites into the surrounding fabric of downtown. Replace the monumental scale needed for major federal buildings with a scale suitable to the local downtown context, by reconstructing historic rights-of-way, dividing superblocks into smaller parcels, and encouraging vibrant contemporary architectural expression. Encourage mixed-use development with residential, retail, and cultural uses, visible from the street and open outside of core business hours, as well as offices, to help support a "living downtown."**

305 **LU-1.2 LARGE SITES AND THE CITY FABRIC 305**

305.1 During the next 20 years, about 15 percent of Washington's housing growth and 10 percent of its job growth will take place on ten large sites outside of the Central Employment Area. The large sites include properties in federal ownership, District ownership, and private ownership. The status of each site varies; redevelopment on a few is imminent, but may be over a decade away on others. Some still contain vital, active uses. Others have been dormant for years. 305.1

## Draft Amendments

- 305.2 Four of the ten sites are owned (at least in part) by the federal government. Consequently, policies in the District Elements for these lands ~~are not binding, and~~ are intended only to express the District's vision for these properties should they be transferred out of federal ownership or use. The District will work in collaboration with the federal government, Washington, DC will make its planning and development decisions regarding these sites so as to be ~~in future planning and development decisions to ensure that development on these sites is~~ compatible with adjacent neighborhoods and to furthers the goals and policies of the District Elements. 305.2

**NEW** Some large recreational sites owned by the federal government are not intended to be transferred out of federal ownership and are not included in this list. However, the District continues to work with and advocate for community-friendly management of these lands. The golf courses at Hains Point, Rock Creek, and the historic Langston Golf Course have the potential to become assets and positive defining features for their neighborhoods

- 305.3 The large sites are shown in Map 3.4 and are listed in Table 3.2 below. The Area Elements should be consulted for a profile of each site and specific policies for its future use. The policies in this section focus on broader issues that apply to all sites. As shown on Map 3.4, several of the sites fall within the boundaries of the Anacostia Waterfront Initiative, an economic revitalization and environmental protection program now being implemented by District Government ~~the Anacostia Waterfront Corporation~~. 305.3

- 305.4 Table 3.2: Large Sites\*

## Draft Amendments

the Central Employment Area. Policies for its use are in the Lower Anacostia Waterfront/Near Southwest Area Element.

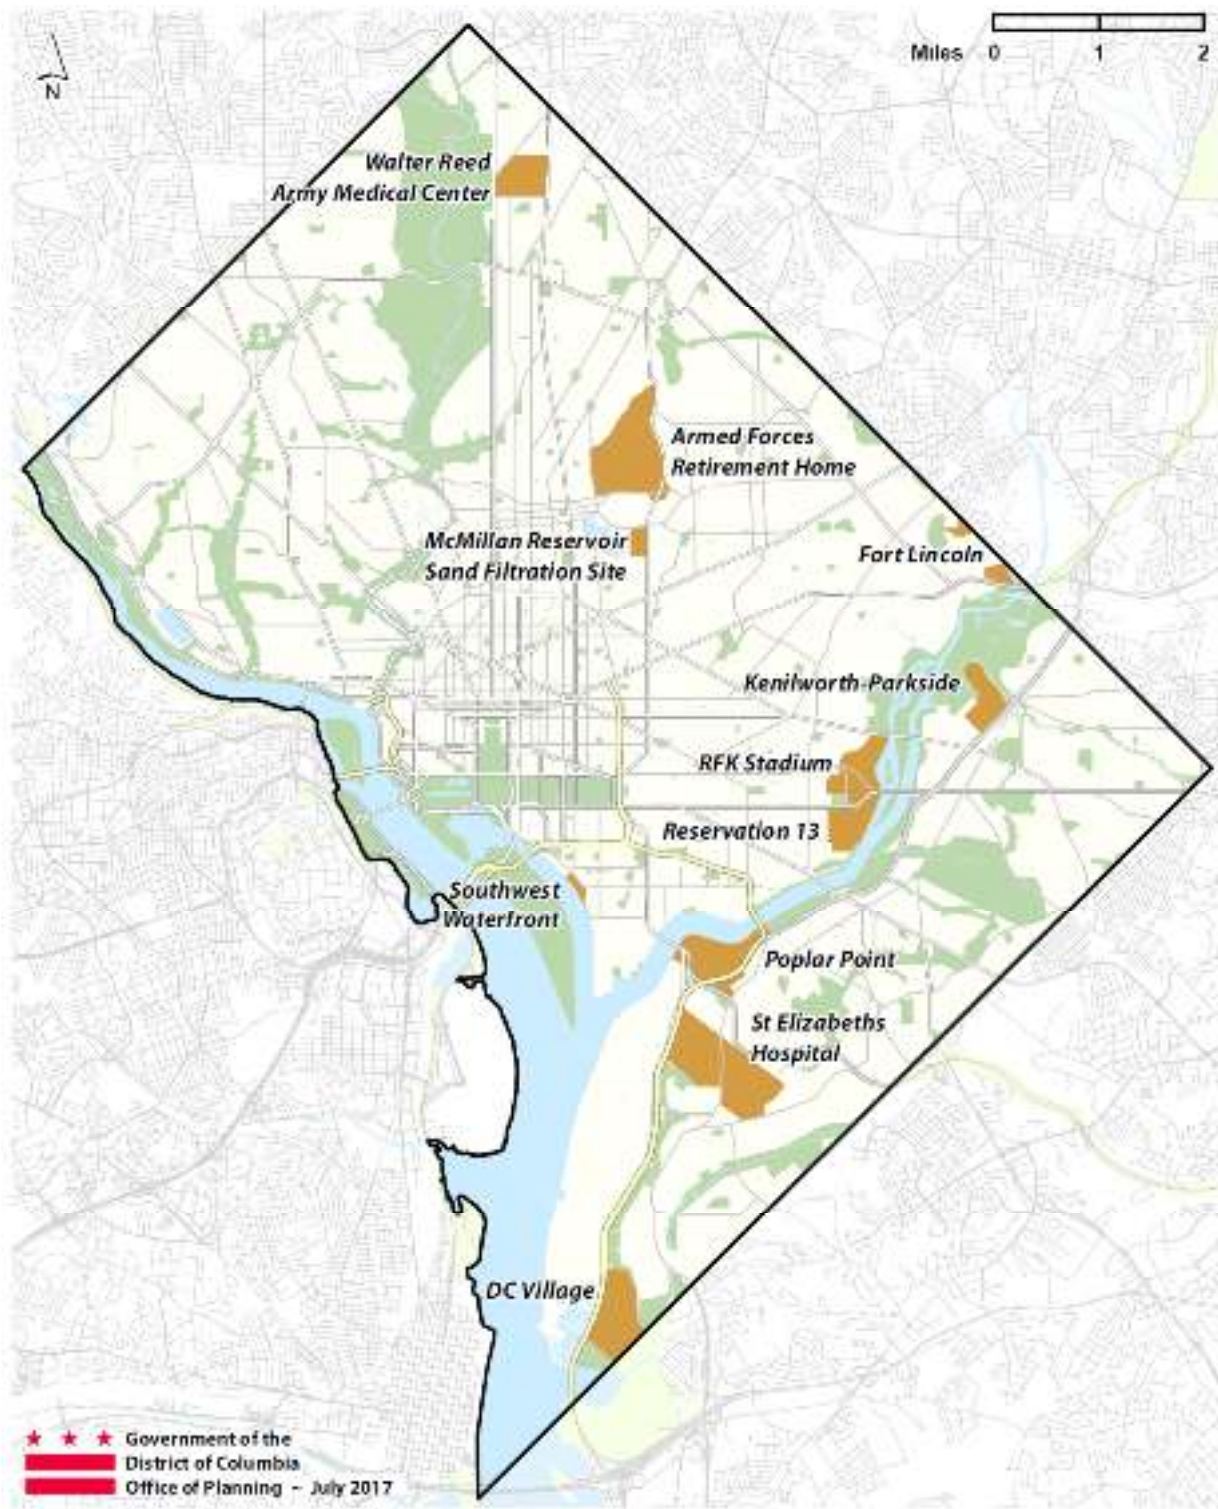

305.5

***Policy LU-1.2.1: Reuse of Large Publicly-Owned Sites***

Recognize the potential for large, government-owned properties to supply needed community services and facilities, create local affordable housing, education and employment opportunities, remove barriers between neighborhoods, enhance equity and inclusion, provide large and significant new parks including wildlife habitat, enhance waterfront access, improve resilience, and improve ~~and stabilize~~ Washington, DC's ~~the city's~~ neighborhoods. 305.5

Draft Amendments

305.6 Map 3.4: Large Sites

## Draft Amendments

305.7 *Policy LU-1.2.2: Mix of Uses on Large Sites*

~~Ensure that~~ ~~T~~he mix of new uses on large redeveloped sites should be ~~is~~ compatible with adjacent uses and provides benefits to surrounding neighborhoods and to Washington, DC ~~the city~~ as a whole. The particular mix of uses on any given site should be generally indicated on the Comprehensive Plan Future Land Use Map and more fully described in the Comprehensive Plan Area Elements. Zoning ~~on such sites~~ should be compatible with adjacent uses, but need not be identical. 305.7

305.8 *Policy LU-1.2.3: Federal Sites*

Work closely with the federal government on re-use planning for those federal lands where a change of use may take place, ~~in the future~~. Even where such properties will remain in federal use, the impacts of new activities on adjacent ~~District~~ neighborhoods should be acknowledged and proactively addressed by federal parties. 305.8

305.9 *Policy LU-1.2.4: New Methods of Land Regulation*

Recognize the opportunity afforded by ~~the District's~~ large sites for innovative land regulation ~~(such as form-based zoning)~~ and the application of sustainable design and resilience principles (green building, biophilic design, and low impact development) on a large scale. 305.9

305.10 *Policy LU-1.2.5: Public Benefit Uses on Large Sites*

Given the significant leverage the District has in redeveloping properties which it owns, include appropriate public benefit uses on such sites if and when they are reused. Examples of such uses are housing, especially affordable housing; new parks and open spaces; health care and civic facilities; public educational facilities; and other public facilities, as well as employer attraction. 305.10

305.11 *Policy LU-1.2.6: New Neighborhoods and the Urban Fabric*

On those large sites that are redeveloped as new neighborhoods (such as Reservation 13), integrate new development into the fabric of the city to the greatest extent feasible. Incorporate extensions of the ~~city~~ street grid, public access and circulation improvements, and new public open spaces, ~~and building intensities and massing that complement adjacent developed areas~~. Such sites should not be developed as self-contained communities, isolated or gated from their surroundings, and should enhance community resilience and promote inclusion. 305.11

## Draft Amendments

305.12 ***Policy LU-1.2.7: ~~Protecting~~ Respecting Existing Assets on Large Sites***

Identify and ~~protect~~ respecting existing assets such as historic buildings, historic site plan elements, important vistas, and major landscape elements as large sites are redeveloped. 305.12

305.13 ***Policy LU-1.2.8: Large Sites and the Waterfront***

Use the redevelopment of large sites to achieve related urban design, open space, environmental, resilience, equity, accessibility, and economic development objectives along the Anacostia Waterfront. Large waterfront sites should be used for water-focused recreation, housing, commercial, and cultural development, with activities that are accessible to both sides of the river. Large sites should further be used to enhance the physical and environmental quality of the river. 305.13

305.14 ***Action LU-1.2.A: Federal Land Transfer***

Continue to work with the federal government to transfer federally-owned ~~waterfront sites and other sites as mutually agreed upon by the federal and District governments~~ to local control, long-term leases, or ownership to capitalize more fully on unrealized ~~waterfront~~ development and parkland opportunities. 305.14

Policies and actions for large sites are contained in the Comprehensive Plan Area Elements.

305.15 ***Action LU-1.2.B Encouraging Livability of Former Federal Lands***

When land is identified to shift from federal to private or local use, develop planning and zoning approaches that provide for, as appropriate, the reconstruction of historic rights-of-way and reservations, integration of the sites into the adjoining neighborhoods, and the enhancement of special characteristics or opportunities of the sites. Encourage cultural, residential, open space, job creation, recreational, and retail to advance ~~ensure~~ mixed-use neighborhoods, even if the site is designated as high-density commercial on the District of Columbia Comprehensive Plan Future Land Use Map. C~~e~~oordinate with the National Capital Planning Commission; as appropriate. 305.15

306 **LU-1.3 TRANSIT-ORIENTED AND CORRIDOR DEVELOPMENT 306**

306.1 Over the last ~~four~~ five decades, the District of Columbia, the federal government, and neighboring jurisdictions have invested billions of dollars in a mass transit system that effectively connects residents in many parts of the city with major employment centers and other destinations. Additional investments in rapid transit, consisting primarily of ~~light rail, streetcars, and~~

## Draft Amendments

~~busways~~dedicated bus lanes, transit signal priority, and express/limited-stop service, are planned along major ~~avenues~~corridors. These improvements are essential to enhance regional mobility and accessibility, respond to future increases in demand, and provide alternatives to single passenger automobiles. The improvements also create the potential to reinforce one of the signature elements of Washington's urban form—its ~~boulevards~~major streets and thoroughfares. 306.1

306.2 Fully capitalizing on the investment made in Metrorail requires ~~better~~ effective use of the land around transit stations and along transit corridors. While many of the District's 40 Metrorail stations epitomize the concept of a "transit village," with pedestrian-oriented commercial and residential development of varying scales, ~~others~~ a few do not. Some stations, including Brookland/CUA, For Totten, Rhode Island Avenue – Brentwood, and Takoma, continue to be surrounded by large surface parking lots and auto-oriented commercial land uses. The same is true for those corridors where ~~light rail or bus rapid~~ premium surface transit service has been implemented or proposed. Some commercial buses pass through fairly dense, walkable neighborhoods. Other station areas ~~s-~~ consist of long, undifferentiated commercial strips with ~~many~~ vacant storefronts, little or no housing, and few amenities for pedestrians. 306.2

306.3 Much ~~of the city's~~ planning during the last ~~five years~~ decade has focused on making better use of transit station areas. Plans have been developed for Columbia Heights, Takoma, Anacostia, Georgia Avenue/Petworth, Brookland, Deanwood, Hill East, Southwest, Maryland Avenue, Rhode Island Avenue, Florida Avenue Market, H Street, and Shaw/Howard University. In each case, the objective was ~~not to apply a "cookie-cutter" model for transit-oriented development, but rather~~ to identify ways to better capitalize on Metrorail and more efficiently use land in the station vicinity. One objective of these initiatives has been to strengthen transit stations as neighborhood centers and attract new investment to struggling business districts. Another important objective has ~~to been~~ to accommodate ~~the growth of the city~~ in a way that minimizes the number and length of auto trips generated, and to reduce household expenses on transportation by providing options for "car-free" (or one car) living. 306.3

306.4 The District's Metrorail stations include 15 stations within the Central Employment Area and 25 "neighborhood" stations (see Map 3.5). Looking forward, certain principles should be applied in the management of land around all of the ~~District's~~ neighborhood stations. These include:

- A preference for mixed residential and commercial uses rather than single purpose uses, in many areas ~~particularly~~ a preference for housing above ground floor ~~retail~~ commercial uses;
- A preference for diverse housing types, including both market-rate and affordable units, a mix of unit sizes that can accommodate both smaller

## Draft Amendments

and larger households, and housing for seniors and persons ~~others~~ with mobility impairments;

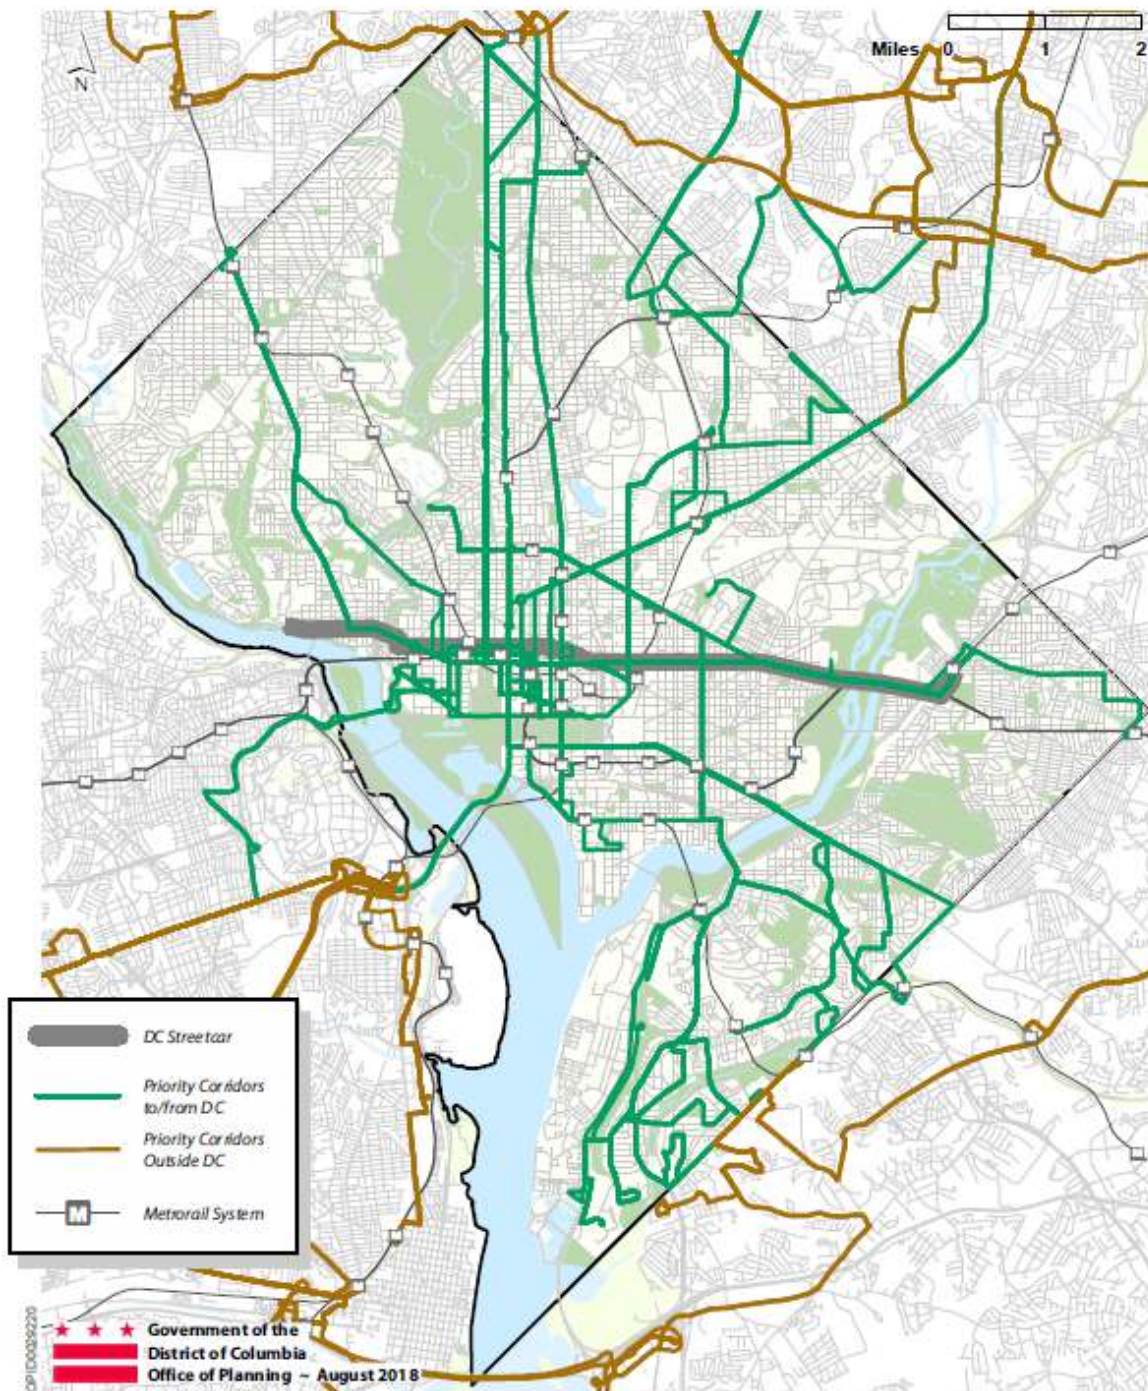

- A priority on attractive, pedestrian-friendly design and a de-emphasis on auto-oriented uses and surface parking;
- Provision of well-designed, well-programmed, and well-maintained public open spaces;
- Appropriate transitions ~~"stepping down"~~ of densities and heights ~~between~~ ~~with distance away from each~~ stations; protecting and lower density uses in the vicinity, recognizing, however, that some major corridors well-served by transit can support higher density even farther away from the Metrorail station;
- Convenient and comfortable connections to the bus system, thereby expanding access to the stations and increasing Metro's ability to serve all parts of the city; and
- ~~A high level of P~~ pedestrian and bicycle connectivity between the stations and the surrounding neighborhoods ~~around them~~. 306.4

306.5 Beyond these core principles, station area development policies must respond to the unique needs of each community and the unique setting of each station. Some station areas wrestle with concerns over too much development, while others struggle to attract development. Moreover, the District's role in facilitating transit-oriented development must vary from station to station. In some parts of the city, weak demand may require public investment and zoning incentives to catalyze development or achieve the desired mix of uses. In other areas, the strength of the private market provides leverage ~~for the District~~ to require public benefits (such as plazas, parks, and child care facilities) when development approval is requested. 306.5

306.6 While transit-oriented development is most commonly thought of as a strategy for Metrorail station areas, it is also applicable to premium transit corridors, ~~and the city's "Great Streets." Seven corridors are designated Great Streets as part of an integrated economic development, transportation, and urban design strategy. The location of these streets is shown in Map 3.5. While not officially designated, four other corridors—Rhode Island Avenue, North/South Capitol Streets, Lower 14<sup>th</sup> Street, and Bladensburg Road—are also shown on the map to recognize their potential for enhancement.~~ 306.6

## Draft Amendments

306.7 Map 3.5: ~~Great Streets~~ Priority Transit Corridors and Transit Stations

306.8 The “reach” of transit-oriented development around any given station or along a high volume transit corridor should vary depending on neighborhood context. While  $\frac{1}{4}$  to  $\frac{1}{2}$  mile is generally used across the country to define the walkable

## Draft Amendments

radius around each station, and therefore the area in which higher densities may accommodate growth without ~~increased~~ **unacceptable increases in** traffic congestion, applying a uniform radius is not **always** appropriate in the District. The established character and scale of the neighborhood surrounding the station should be considered, as should factors such as topography, demographics, and the station's **or corridor's** capacity to support new transit riders. Many stations abut historic or ~~stable~~ low density neighborhoods. Similarly, many ~~of the city's~~ priority transit corridors transition to single family homes or row houses just one-half block or less off the street itself, **warranting due attention when development is planned.** 306.8

306.9 ~~To avoid adverse effects on low and moderate density neighborhoods, most transit-oriented development should be accommodated on commercially zoned land. Possible rezoning of such land in a manner that is consistent with the Future Land Use Map and related corridor plans should be considered. Current zoning already expresses a preference for the use of such land for housing by permitting more density for mixed-use projects than for projects with commercial uses alone. At the same time, some of the existing zoning categories were drafted at a time when peak hour transit volumes were lower and regional congestion was less severe. Changes to the regulations may be needed to recognize the widespread desirability of transit use by those within walking distance, taking into consideration station and system wide capacity issues and the other factors listed above.~~ 306.9

306.10 ***Policy LU-1.3.1: Station Areas as Neighborhood Centers***

Encourage the development of Metro stations as anchors for **residential,** economic and civic development **and to accommodate population growth with new nodes of residential development, including affordable housing in all areas of the District in order to create great new walkable places and to enhance access and opportunities for all District residents.** ~~in locations that currently lack adequate neighborhood shopping opportunities and employment.~~ The establishment and growth of mixed use centers at Metrorail stations should be supported as a way to **provide housing opportunities at all income levels** ~~reduce automobile congestion,~~ improve air quality, increase jobs, provide a range of retail goods and services, reduce reliance on the automobile, enhance neighborhood stability, create a stronger sense of place, provide civic gathering places, and capitalize on the development and public transportation opportunities which the stations provide. This **policy must be balanced with** ~~policy should not be interpreted to outweigh~~ other land use policies which ~~call for~~ **include conserving** neighborhoods ~~conservation. Each Metro station area is unique and must be treated as such in planning and development decisions. At the same time, there are standards for~~ achieving **levels of population and employment density to levels of transit service to guide, but not decisively determine, thresholds of station-area development.** The Future Land Use Map

## Draft Amendments

expresses the desired intensity and mix of uses around each station, and the Area Elements (and in some cases Small Area Plans) provide more detailed direction for each station area. 306.10

306.11 ***Policy LU-1.3.2: Development Around Metrorail Stations***

~~Concentrate redevelopment efforts on those Metrorail station areas which offer the greatest opportunities for infill development and growth, particularly stations in areas with weak market demand, or with large amounts of vacant or poorly utilized land in the vicinity of the station entrance.~~ Ensure that In developments above and around Metrorail ~~such~~ stations, emphasizes land uses and building forms which minimize the necessity of automobile use and maximize transit ridership while reflecting the design capacity of each station and respecting the character and needs of the surrounding areas. 306.11

306.12 ***Policy LU-1.3.3: Housing Around Metrorail Stations***

Recognize the ~~opportunity need~~ to build housing that serves a mix of incomes and household types including families, seniors, ~~housing and more affordable "starter" housing for first-time homebuyers~~ and persons with a range of incomes from the lowest to persons who can afford high priced, market rate units adjacent to Metrorail stations, given the reduced necessity of auto ownership (and related reduction in household expenses) in such locations. 306.12

**NEW**

***Policy LU-1.3.3a: Affordable Rental and For-Sale Multifamily Housing Near Metrorail Stations***

Explore mechanisms to encourage permanent affordable rental and for-sale multifamily housing adjacent to Metrorail stations, given the need for accessible affordable housing and the opportunity for car-free and car-light living in such locations.

306.13 ***Policy LU-1.3.4: Design To Encourage Transit Use***

Require architectural and site planning improvements around Metrorail stations that support pedestrian and bicycle access to the stations and enhance the safety, comfort and convenience of passengers walking to the station or transferring to and from local buses. These improvements should include lighting, signage, landscaping, and security measures. Discourage the development of station areas with conventional suburban building forms, such as shopping centers surrounded by surface parking lots, or low-density housing. 306.13

306.14 ***Policy LU-1.3.5: ~~Edge Conditions Around Transit Stations~~ Development Along Corridors***

## Draft Amendments

**Encourage growth and development along major corridors, particularly priority transit and multimodal corridors. Plan and design** ~~Ensure that development adjacent to Metrorail stations is planned and designed to respect the character, scale, and integrity of adjacent neighborhoods while balancing against the city's broader need for housing. For stations that are located within or close to low density areas, building heights should "step down" as needed to avoid dramatic contrasts in height and scale between the station area and nearby residential streets and yards.~~ 306.14

306.15 ***Policy LU-1.3.6: Parking Near Metro Stations***

Encourage the creative management of parking around transit stations, ensuring that ~~automobile~~ **multimodal** needs are balanced ~~with transit, pedestrian, and bicycle travel needs.~~ New parking should generally be set behind or underneath buildings, ~~and geared toward short term users rather than~~ **Parking should be managed and priced to focus on availability and turnover, rather than serving the needs of** all-day commuters. **As existing parking assets are redeveloped, one-for-one replacement of parking spaces should be discouraged, since more transit riders will be generated by people living, working, and shopping within walking distance of the transit station.** 306.15

306.16 ***Policy LU-1.3.7: TOD Boundaries***

Tailor the reach of transit-oriented development (TOD) policies and associated development regulations to reflect the specific conditions at each Metrorail station and along each transit corridor. The presence of historic districts, **landmark status,** and conservation areas should be ~~a significant~~ considerations as these policies are applied. 306.16

306.17 ***Policy LU-1.3.8: Public Facilities***

Encourage the siting (or retention and modernization) of public facilities such as schools, libraries, and government offices near transit stations and along transit corridors. Such facilities should be a focus for community activities and should enhance neighborhood identity. 306.17

**NEW** ***Policy LU-1.3.9: Co-Location of Private and Public Facilities***

**Co-locate private and public-uses if possible whenever the District seeks to modernize, expand, or build new public facilities. Co-located uses should align with citywide priorities and can include affordable senior housing, affordable multi-family housing, recreation facilities, and health-related facilities.**

## Draft Amendments

306.18 *Action LU-1.3.A: Station Area and Corridor Planning*

Conduct detailed station area and corridor plans ~~and studies prior to the creation of TOD overlays in an effort to avoid potential conflicts between TOD and neighborhood conservation goals. These plans should be prepared~~ collaboratively with WMATA and local communities ~~that and should~~ include detailed surveys of parcel characteristics (including lot depths and widths), existing land uses, structures, street widths, the potential for buffering, and possible development impacts on surrounding areas. Plans should also address joint public-private development opportunities, urban design improvements, ~~traffic~~ transportation demand and parking management strategies, integrated bus service and required service facilities, capital improvements, neighborhood conservation and enhancement, and recommended land use and zoning changes. 306.18

306.19 *Action LU-1.3.B: ~~TOD Overlay Zone~~ Zoning Around Transit*

~~During the forthcoming revision to the zoning regulations, The language should include provisions for mixed land uses, minimum and maximum densities (inclusive of density bonuses), parking maximums, and buffering and design standards that reflect the presence of transit facilities. Work with land owners, the Council of the District of Columbia, local ANCs, community organizations, WMATA, and the Zoning Commission to determine the stations where such a zone should be applied. The emphasis should be on stations that have the capacity to accommodate substantial increases in ridership and the potential to become pedestrian-oriented urban villages. Neighborhoods that meet these criteria and that would welcome a TOD overlay are the highest priority. 306.19~~  
Developments around transit stations and transit stops should optimize the potential for pedestrian-oriented urban villages; should consider coordinated and/or shared parking and loading; and should be designed to help integrate the transit facility with neighborhood character.

NEW *Action LU-1.3.C: Metro Station and Inclusionary Zoning*

Consider requiring the maximum percent of affordable units required by the Inclusionary Zoning Program in and around station areas, with the appropriate bonus density and height allowances.

NEW *Action LU-1.3.D: Co-Location Opportunity Evaluation*

Evaluate potential co-location of public and private uses as part of facilities modernization, expansion, and new construction.

## Draft Amendments

**NEW****Action LU-1.3.E: Coordination of Co-Location Opportunities with Capital Budget**

**Provide the outcome of the co-location opportunity evaluation for projects that meet the threshold criteria as part of the yearly capital budget request submission to the Office of the City Administrator.**

**307****LU-1.4 NEIGHBORHOOD INFILL DEVELOPMENT 307****307.1**

~~There are~~ **H**undreds of small vacant lots across the District of Columbia **are** located away from transit stations and off of the major boulevards. Analysis conducted through the Comprehensive Plan revision determined that vacant, residentially-zoned lots totaled more than 400 acres in 2005. Approximately 50 percent of this acreage was zoned for single family homes, 15 percent was zoned for townhomes and rowhomes, and 35 percent was zoned for multi-family development. Most of the sites were less than one acre in size. Some of this land may not be developable to the limits allowed by zoning due to site constraints such as poor access, awkward parcel shapes, and steep topography.

307.1

**307.2**

Infill development on vacant lots is strongly supported in the District of Columbia, provided that such development is compatible ~~in scale~~ with its surroundings and consistent with environmental protection and public safety objectives. **Opportunities for change from vacant to vibrant are in residential and commercial areas.** In residential areas, infill sites present some of the best opportunities ~~in the city~~ for "family" housing and low-to-moderate-density development, **as well as community gardens and pocket parks.** In commercial areas, infill development can fill gaps in the streetwall and create more cohesive and attractive neighborhood centers. Vacant lots in such settings may also present opportunities for public uses, ~~such as pocket parks, job training facilities, and child care centers.~~

307.2

**307.3**

In both residential and commercial settings, infill development must be sensitive to neighborhood context. High quality design standards should be required **and the infill development should reflect the neighborhood.** ~~the privacy of neighboring structures should be respected, and density and scale should reflect the desired character of the surrounding area.~~

307.3

**307.4**

Infill development may also include the restoration of vacant and abandoned structures. In 2003, there were an estimated 2,700 vacant and abandoned residential properties in the District. While the number has declined since then, some parts of the city continue to have relatively high concentrations of vacant buildings. ~~As noted in the Housing Element, the city's Home Again Initiative~~

## Draft Amendments

~~was launched in 2003 to restore such properties to active use.~~ 307.4

**NEW**

**Accessory dwelling units are another form of infill development that can provide opportunities for addressing affordability. Accessory dwelling units can provide opportunities to age in place, purchase a first home, or help pay a mortgage.**

307.5 ***Policy LU-1.4.1: Infill Development***

Encourage infill development on vacant land within the city, particularly in areas where there are vacant lots that create “gaps” in the urban fabric and detract from the character of a commercial or residential street. Such development should complement the established character of the area and should not create sharp changes in the physical development pattern. 307.5

307.6 **Policy LU-1.4.2: Long-Term Vacant Sites**  
Facilitate the reuse of vacant lots that have historically been difficult to develop due to infrastructure or access problems, inadequate lot dimensions, fragmented or absentee ownership, or other constraints. Explore lot consolidation, acquisition, and other measures which would address these constraints. 307.6

307.7 ~~***Policy LU-1.4.3: Zoning of Infill Sites***~~

~~Ensure that the zoning of vacant infill sites is compatible with the prevailing development pattern in surrounding neighborhoods. This is particularly important in single family and row house neighborhoods that are currently zoned for multi-family development.~~ 307.7

See the Housing Element for policies on the development of “New Communities” on the sites of aging public housing complexes and a discussion of the city’s “Home Again” program for rehabilitating vacant properties.

**308 LU-2 CREATING AND MAINTAINING ~~SUCCESSFUL~~ INCLUSIVE NEIGHBORHOODS 308**

308.1 This section of the Land Use Element focuses on land use issues within the District’s neighborhoods. It begins with a set of broad policies which state the city’s commitment to sustaining neighborhood diversity and ~~protecting~~ **enhancing** the defining characteristics of each community. This is followed by a discussion of neighborhood appearance, particularly the treatment of abandoned and blighted properties. This section then turns to a discussion of residential land use compatibility issues, followed by a discussion of neighborhood centers and commercial land use compatibility issues. 308.1

## Draft Amendments

## 309 LU-2.1 A CITY OF NEIGHBORHOODS 309

- 309.1 The same effort given to keep Washington's monumental core a symbol of national pride must be given to the city's neighborhoods. After all, Washington, DC's ~~the~~ public image ~~of the city~~ is defined as much by the diversity and vibrancy of its communities, local culture, homes, businesses, streets, and neighborhood spaces as it is by its monuments and federal buildings. For Washington's residents, the neighborhoods are the essence of the city's social and physical environment. Strong neighborhoods are key for continued livability in a growing and changing city. Land use policies must ensure that all neighborhoods have adequate access to commercial services, parks, educational and cultural facilities, share in economic mobility, and sufficient and accessible housing opportunities while ~~protecting~~ respecting their rich historic and cultural legacies. 309.1
- 309.2 Washington has no fewer than 130 distinct and identifiable neighborhoods today. They range from high-density urban mixed use communities like the West End and Mount Vernon Square to quiet, low-density neighborhoods like Crestwood and Spring Valley, providing a wide range of choices for ~~the District's~~ many different types of households. Just as their physical qualities vary, the social and economic characteristics of ~~the city's~~ neighborhoods also vary. In 2001, the DC Office of Planning studied neighborhoods using ~~used~~ a range of social and economic indicators, ~~including to classify neighborhoods as "stable", "transitional", "emerging", or "distressed." These indicators included~~ income, home value and sales, school performance, crime rates, poverty rates, educational attainment, and building permit activity, among others. While much has changed since 2001 including substantial population growth, the emergence of new residential neighborhoods and the revitalization of established neighborhoods, the neighborhood data remain instructive for the purposes of land use policy and should be updated when a new Comprehensive Plan is undertaken. 309.2
- 309.3 ~~Most~~ Many of the District's ~~recent~~ planning efforts have focused on transitional, emerging, and distressed neighborhoods. Land use strategies for these areas have emphasized the reuse of vacant sites, the refurbishment (or replacement) of abandoned or deteriorating buildings, the removal of illegal land uses, and improvements to the public realm (e.g., streets and public buildings). These strategies have been paired with incentives for the private sector to reinvest in each neighborhood and provide new housing choices and services. A different set of land use strategies has been applied in "stable" neighborhoods, emphasizing commercial enhancement strategies, public space design, neighborhood ~~conservation~~ character, and appropriate infill.

## Draft Amendments

Land use policies in these areas have focused on retaining neighborhood character, mitigating development impacts on services and infrastructure, preventing demolition in historic districts, and improving the connection between zoning and present and desired land uses. 309.3

**NEW**

**Other planning efforts have focused on reconnecting neighborhoods divided by large transportation infrastructure such as highways and railyards. Reconnection provides for strengthening existing neighborhoods and creating new neighborhoods to accommodate the growing population such as in the NoMa, Capitol Crossing, and Walter Reed areas. These planning efforts include framework plans to provide design guidance, define and activate the public realm, support neighborhood sustainability and resilience, and identify retail strategies.**

**NEW**

**Continued growth, competing demands for land, and the desire to manage policy priorities across Washington, DC requires renewed attention to all areas in the city.**

309.4

During the coming decades, the District will keep striving for **greater equity across all neighborhoods in terms of access to housing, job opportunities, economic mobility, energy innovation, and amenities** ~~increased stability in its transitional, emerging, and distressed neighborhoods~~. This does not mean that all neighborhoods should become the same, or that a uniform “formula” ~~for stability~~ should be applied to each community. Rather, it means that each neighborhood should have certain basic assets and amenities (see text box below). These assets and amenities should be ~~protected~~ **respected** and enhanced where they exist today, and created or restored where they do not. 309.4

309.5

***Policy LU-2.1.1: Variety of Neighborhood Types***

Maintain a variety of ~~residential~~ neighborhood ~~types in the District~~, ranging from low-density, ~~single family~~ neighborhoods to high-density, ~~multi-family mixed-use~~ neighborhoods. The positive elements that create the identity and character of each neighborhood should be preserved and enhanced ~~in the future~~ **while encouraging the identification of appropriate sites for new development, and/or adaptive reuse to help accommodate population growth and advance affordability and opportunity.** 309.5

309.6

What Makes a Great Neighborhood? 309.6

**A successful neighborhood should create a sense of belonging, civic pride, and a collective sense of stewardship and responsibility for the community's future among all residents. Indeed, a neighborhood's success must be measured by more than the income of its residents or the size of its homes. Building upon the** ~~In~~ 2004, “A Vision for Growing an Inclusive City” identified essential physical qualities that all neighborhoods should share. These

## Draft Amendments

included:

- Transportation options for those without a car, including convenient bus service, **car sharing, bicycle facilities**, and safe access for pedestrians;
- Easy access to shops and services meeting day-to-day needs, such as child care, groceries, and sit-down restaurants;
- Housing choices, including homes for renters and for owners, and a range of units that meet the different needs of the community;
- Safe, clean public gathering places, such as parks and plazas—places to meet neighbors, places for children to play, and places to exercise or connect with nature;
- Quality public services, including police and fire protection, **high-quality**, safe and modernized schools, **health services**, and libraries and recreation centers that can be conveniently accessed ~~(though not necessarily located within the neighborhood itself)~~;
- Distinctive character and a "sense of place", defined by neighborhood architecture, visual landmarks and vistas, streets, public spaces, and historic places;
- Evidence of visible public maintenance and investment—proof that the city "cares" about the neighborhood and is responsive to its needs; and
- A healthy natural environment, with street trees and greenery, and easy access to the city's open space system.

**The understanding of what makes a great neighborhood has evolved, particularly in terms of addressing social equity, advancing sustainability, and building community resilience to everyday challenges as well as environmental and manmade disasters. Where a resident lives - their neighborhood - remains one of the greatest predictors of individual health and economic outcomes. To achieve inclusive growth, neighborhood success must not only include achieving the desired physical characteristics but also ensuring that every community plays a part in supporting investment and development that advances neighborhood vitality, growth, and economic mobility, and increases access, equity, and where appropriate, jobs.** ~~A neighborhood's success must be measured by more than the income of its residents or the size of its homes. A successful neighborhood should create a sense of belonging and civic pride, and a collective sense of stewardship and responsibility for the community's future among all residents.~~

The positive elements that create the identity and character of each neighborhood should be preserved and enhance ~~d in the future.~~

309.7

***Policy LU-2.1.2: Neighborhood Revitalization***

Facilitate ~~orderly~~ neighborhood revitalization ~~and stabilization~~ by focusing District grants, loans, housing rehabilitation efforts, commercial investment programs, capital improvements, and other government actions in those areas that are most in need, **except where projects advance equity and opportunity**

## Draft Amendments

**for disadvantaged persons.** Use social, economic, and physical indicators such as the poverty rate, the number of abandoned or substandard buildings, the crime rate, and the unemployment rate as key indicators of need. 309.7

309.8 ***Policy LU-2.1.3: Conserving, Enhancing, and Revitalizing Neighborhoods***

Recognize the importance of balancing goals to increase the housing supply **including affordable units** and expand neighborhood commerce with parallel goals to ~~protect~~ **respect** neighborhood character, preserve historic resources, and restore the environment. The overarching goal to “create successful neighborhoods” in all parts of the city requires an emphasis on ~~conservation~~ **conserving units and character** in some neighborhoods and revitalization in others **although all neighborhoods have a role in helping to meet broader District-wide needs such as affordable housing, public facilities, etc.** 309.8

309.9 ***Policy LU-2.1.4: Rehabilitation Before Demolition***

In redeveloping areas characterized by vacant, abandoned, and underutilized older buildings, generally encourage rehabilitation and adaptive reuse of **architecturally or historically significant** existing buildings, rather than demolition. 309.9

309.10 ***Policy LU-2.1.5: ~~Conservation of Single-Family~~ Neighborhoods Support***

~~Protect and conserve~~ **Support** the District’s **established** ~~stable, low density~~ neighborhoods ~~and ensure that their zoning reflects their established low density character.~~ Carefully manage the development of vacant land ~~and the alteration of existing structures~~ in and ~~adjacent to single-family~~ **around** neighborhoods in order to ~~protect low density~~ **respect** character, **housing, affordable housing, civic space,** preserve open space, and maintain neighborhood scale. 309.10

309.11 ***Policy LU-2.1.6: Teardowns and Mansionization***

Discourage the replacement of quality homes in good physical condition with new **single-family** homes that are substantially larger, taller, ~~and~~ bulkier, **or more likely to require more energy** than the prevailing building stock. 309.11

## Draft Amendments

309.12 *Policy LU-2.1.7: ~~Conservation of Row House Neighborhoods~~ Character*

~~Protect~~ **Respect** the character of row house neighborhoods by requiring the height and scale of structures to be consistent with the existing pattern, ~~considering additional row house neighborhoods for historic district designation, and regulating the subdivision of row houses into multiple dwellings.~~ Upward and outward extension of row houses which compromise their design and scale should be discouraged. 309.12

309.13 *Policy LU-2.1.8: Zoning of Low and Moderate Density Neighborhoods*

Unless a small area plan, District agency directive or study indicates otherwise, ~~D~~discourage the rezoning of areas currently developed with single family homes, duplexes, and rowhouses (e.g., R-1 through ~~R-4~~**RF**) for multi-family apartments (e.g., R-5) where such action would likely result in the demolition of housing in good condition and its replacement with structures that are potentially out of character with the existing neighborhood. 309.13

309.14 *Policy LU-2.1.9: ~~Addition of Floors and Roof Structures to Row Houses and Apartments~~ Alterations to Rowhouses and Apartments*

Generally discourage alterations to buildings that result in a loss of family-sized units ~~increases in residential density~~ resulting from new floors and roof structures (with additional dwelling units) being added to the tops of existing row houses and apartment buildings, ~~if particularly where~~ such additions would be architecturally undistinguished and out of character with the other structures on the block. Roof structures should only be permitted if they ~~would not harm the~~ aim to respect the architectural character of the building on which they would be added, ~~or other buildings nearby.~~ 309.14

309.15 *Policy LU-2.1.10: Multi-Family Neighborhoods*

Maintain the multi-family residential character of the District's Medium- and High-Density residential areas. Limit the encroachment of large scale, incompatible commercial uses into these areas, unless those uses would likely provide jobs for nearby residents, and make these areas more attractive, pedestrian-friendly, and transit accessible. 309.15

309.16 *Policy LU-2.1.11: Residential Parking Requirements*

~~Ensure that~~ **P**arking requirements for residential buildings ~~should be~~ responsive to the varying levels of demand associated with different unit types, unit sizes, ~~and~~ unit locations (including proximity to transit), and new technology (including the sharing economy and electronic vehicles). Parking

## Draft Amendments

should be accommodated in a manner that maintains an attractive environment at the street level and minimizes interference with traffic flow. Reductions in parking may be considered where transportation demand management measures are implemented and a reduction in demand can be ~~clearly~~ demonstrated. 309.16

Please refer to the Transportation Element for additional policies and actions related to parking management.

309.17 ***Policy LU-2.1.12: Reuse of Public Buildings***

Rehabilitate vacant or outmoded public and semi-public buildings for continued use. Reuse plans should be compatible with their surroundings, **and co-location of uses considered to meet broader District-wide goals.** ~~and should limit the introduction of new uses that could adversely affect neighboring communities.~~ **Reuse of public buildings should implement small area and framework plans where possible.** 309.17

309.18 ***Policy LU-2.1.13: Flag Lots***

~~Generally discourage the use of “flag lots” (lots with little or no street frontage, accessed by a driveway easement or narrow strip of land and typically located to the rear of another lot) when subdividing residential property.~~ 309.18

319.18a ***Policy LU-2.1.14: Planned Unit Developments in Neighborhood Commercial Corridors***

~~Consider modifying minimum lot size and other filing and procedural (but not height and density) requirements for Planned Unit Developments (PUDs) for neighborhood commercial areas for the purpose of allowing small property owners to participate in projects that encourage high quality developments and provide public benefits.~~ **Planned Unit Developments (PUDs) in neighborhood commercial areas should provide high quality developments with active ground floor designs that provide for neighborhood commercial uses, vibrant pedestrian spaces and public benefits including housing, affordable housing, and affordable commercial space.** 309.18a

309.19 ***Action LU-2.1.A: Rowhouse Zoning District***

~~Develop a new row house zoning district or divide the existing R-4 district into R-4-A and R-4-B to better recognize the unique nature of row house neighborhoods and conserve their architectural form (including height, mass, setbacks, and design).~~ **Completed – See Implementation Table.** 309.19

## Draft Amendments

309.20 ***Action LU-2.1.B: Amendment of Exterior Wall Definition***

Amend ~~the city's~~ procedures for roof structure review so that the division- on-line wall or party wall of a row house or semi-detached house is treated as an exterior wall for the purposes of applying zoning regulations and height requirements. Completed – See Implementation Table. 309.20

309.21 ***Action LU-2.1.C: Residential Rezoning***

Provide a better match between zoning and existing land uses in ~~the city's~~ residential areas, with a particular focus on:

- a. Blocks of well-established single family and semi-detached homes that are zoned R-3 or higher;
- b. Blocks that consist primarily of row houses that are zoned R-5-B or higher; and
- c. Historic districts where the zoning does not match the predominant contributing properties on the block face.

In all three of these instances, ~~pursue~~ consider rezoning to appropriate densities to ~~protect~~ respect the predominant architectural character and scale of the neighborhood. 309.21

309.22 ***Action LU-2.1.D: Avoiding “Mansionization”***

~~Consider adjustments to the District's zoning regulations to address the construction of excessively large homes that are out of context with the surrounding neighborhood (“mansionization”). These adjustments might include the use of a sliding scale for maximum lot occupancy (based on lot size), and the application of floor area ratios in single family zone districts to reduce excessive building mass. They could also include creation of a new zoning classification with a larger minimum lot size than the existing R-1 A zone, with standards that more effectively control building expansion and lot division.~~ Obsolete – see Implementation Table. 309.22

**NEW** ***Action LU-2.1.E: Study of Neighborhood Indicators***

Conduct ongoing review with periodic publication of social and economic neighborhood indicators for the purpose of targeting neighborhood investments, particularly for the purposes of achieving neighborhood diversity and fair housing.

**NEW** ***Action LU-2.1.F: Electric Vehicle Supply Equipment***

Encourage the siting of electric vehicle supply equipment in curbside public space, multi-dwelling unit garages, commercial facilities, and residential areas, where appropriate.

## Draft Amendments

**310 LU-2.2 MAINTAINING COMMUNITY STANDARDS 310**

310.1 “Community standards” encompasses a broad range of topics relating to the physical appearance and quality of ~~the city’s~~ neighborhoods. The District maintains planning, building, housing, zoning, environmental, ~~tax~~, and other regulations and codes aimed at protecting public safety and keeping ~~the city’s~~ neighborhoods in excellent physical condition. However, instances of neglected and abandoned properties, illegal uses, unpermitted construction, and code violations are still common in many parts of the city. Despite dramatic improvements in code enforcement during recent years and a 50 percent drop in the number of vacant properties since 2000, more effective and responsive enforcement remains one of the most frequently raised planning issues ~~in the District~~ today. 310.1

310.2 ***Policy LU-2.2.1: Code Enforcement as a Tool for Neighborhood ~~Conservation~~ Stabilization***

Recognize the importance of consistent, effective, and comprehensive code enforcement, and enforcement of the higher tax rates applied to vacant, and vacant and blighted property, to the ~~protection~~ enhancement of residential neighborhoods. Housing, building, property tax, and zoning regulations must be strictly applied and enforced in all neighborhoods ~~of the city~~ to prevent deteriorated, unsafe, and unhealthy conditions; reduce illegal activities; maintain the general level of residential uses, densities, and height; provide incentives for rehabilitating property and getting it occupied; and ensure that promptly correct health and safety hazards. ~~are promptly corrected.~~ 310.2

310.3 ***Policy LU-2.2.2: Appearance of Vacant Lots and Structures***

Maintain and enforce ~~District~~ programs ~~(such as “Clean It Or Lien It”) which ensure~~ that keep vacant lots and buildings ~~are kept~~ free of debris, litter, and graffiti. Such sites should be treated in way that eliminates neighborhood blight, improves visual quality, and enhances public safety. 310.3

310.4 ***Policy LU-2.2.3: Restoration or Removal of Vacant and Abandoned Buildings***

Reduce the number of vacant and abandoned buildings ~~in the city~~ through renovation, rehabilitation, and where necessary, demolition. Implement programs that encourage the owners of such buildings to sell or renovate them, and apply liens, fines, higher taxes, charges for public clean-up of the property, and other penalties for non-compliant properties. 310.4

## Draft Amendments

310.5 ***Policy LU-2.2.4: Neighborhood Beautification***

Encourage projects which improve the visual quality of ~~the District's~~ neighborhoods, including landscaping and tree planting, facade improvement, anti-litter campaigns, graffiti removal, **murals**, improvement or removal of abandoned buildings, street and sidewalk repair, ~~and~~ park improvements, **and public realm enhancement and activation.** 310.5

310.6 ***Policy LU-2.2.5: Enforcement of Approval Conditions***

Fully enforce conditions of approval for new development, **including design, building, and operating criteria.** ~~Ensure that such projects are designed, built, and operated consistently with such conditions, and apply appropriate penalties in the event of non-compliance.~~ 310.6

310.7 ***Policy LU-2.2.6: Public Stewardship***

Support efforts by local Advisory Neighborhood Commissions, citizen/civic associations, garden clubs, homeowner groups, and other organizations to initiate neighborhood improvement and beautification programs. Provide information, guidance, and technical assistance to these groups as appropriate or feasible. 310.7

310.8 ***Policy LU-2.2.7: Alley ~~Closings~~ Use***

Discourage the conversion of alleys to private yards or developable land when the alleys are part of the historic fabric of the neighborhood and would otherwise continue to perform their intended functions, such as access to rear garages and service areas for trash collection. **Support the greening of residential alleys where feasible to enhance sustainability and stormwater management. Encourage potential activation of commercial alleys in business districts through art, programming, and events, where not in conflict with the intended function of the alley network.** 310.8

310.9 ***Action LU-2.2.A: Vacant Building Inventories***

Maintain and continuously update data on vacant and abandoned buildings, **following up on public reports of vacant buildings,** ~~in the city~~, and regularly assess the potential for such buildings to support new uses and activities. This should include periodic assessment of ~~the city's~~ vacant building monitoring **and taxation** programs and exploring creative ways to deal with vacant properties and long-term vacant sites. **Strategically purchase such properties at tax delinquency sales when such properties could be put into use for affordable housing.** 310.9

## Draft Amendments

310.10 ***Action LU-2.2.B: Education and Outreach on Public Space Maintenance***

Develop a public outreach campaign on the District's public space regulations (including the use of such space for announcements, campaign signs, and advertising), and resident/District responsibilities for maintenance of public space, including streets, planting strips, sidewalks, and front yards. 310.10

**NEW** ***Action LU-2.2.C: Forested Land Preservation***

**Provide incentives to preserve privately owned forest land and enhance tree canopy, such as through easements, forest mitigation bank programs, or transfer of development rights, and enforce laws preserving special and heritage trees.**

**311 LU-2.3 RESIDENTIAL LAND USE COMPATIBILITY 311**

311.1 Many of Washington's neighborhoods were developed before 1920, when ~~the city adopted~~ its first zoning regulations were applied. As a result, the older neighborhoods tend to have a patchwork pattern of land uses, with business and residential activities sometimes occurring on the same block. While this pattern has created some of ~~the city's~~ most desirable and interesting neighborhoods, it has also introduced the potential for conflict. Certain commercial and industrial uses may generate noise, odor, traffic, litter, and other impacts that affect the quality of life in adjacent residential neighborhoods. Similarly, introducing new residential uses to commercial or industrial areas can make it difficult for established businesses to operate effectively. 311.1

311.2 Land use compatibility is addressed through the District's zoning regulations. The regulations list uses that are permitted as a matter-of-right and those that are permitted with a Special Exception (and in some cases, uses that are prohibited) in each zone. Over the years, a variety of "standards for external effects" have been applied to address the impacts of different activities on adjacent uses. ~~However, the Zoning Regulations have not been comprehensively updated in almost 50 years, and do not address land use compatibility issues as effectively as they might. More effective use of performance standards, buffering and screening requirements, management of "problem" land uses, and the examination of appropriate matter of right uses should be pursued as the Zoning Regulations are redrafted~~ In 2016 the Zoning Commission adopted a comprehensive update to the Zoning Regulations; the first comprehensive revision in over 50 years. The revised zoning regulations, referred to as ZR16, address land use compatibility issues, more effective use of performance standards, buffering and screening requirements, updated development and design standards, and new standards for parking and loading. ZR-16 also includes new definitions, new zones, and changes to

## Draft Amendments

**matter-of-right and special exception uses. ZR16 is an important step in implementing goals for achieving a healthy, vibrant, diverse and environmentally sustainable city.** 311.2

311.3 ***Policy LU-2.3.1: Managing Non-Residential Uses in Residential Areas***

Maintain zoning regulations and development review procedures that prevent the encroachment of inappropriate commercial uses in residential areas; and (b) limit the scale and extent of non-residential uses that are generally compatible with residential uses, but present the potential for conflicts when they are excessively concentrated or out of scale with the neighborhood. 311.3

311.4 ***Policy LU-2.3.2: Mitigation of Commercial Development Impacts***

Manage new commercial development so that it does not result in unreasonable and unexpected traffic, parking, litter, shadow, view obstruction, odor, noise, and vibration impacts on surrounding residential areas. Before commercial development is approved, establish **appropriate** requirements for ~~traffic-~~ **transportation demand management** and noise control, parking and loading management, building design, hours of operation, and other measures as needed to avoid ~~such~~ **possible** adverse effects **of the benefits of commercial development in enlivening neighborhoods, generating taxes and creating jobs.** 311.4

311.5 ***Policy LU-2.3.3: Buffering Requirements***

**Buffer** ~~Ensure that~~ new commercial development adjacent to lower density residential areas ~~provides effective physical buffers~~ to avoid adverse effects. Buffers may include ~~larger~~ setbacks, landscaping, fencing, screening, height step downs, and other architectural and site planning measures that avoid potential conflicts. 311.5

311.6 ***Policy LU-2.3.4: Transitional and Buffer Zone Districts***

Maintain mixed use zone districts which serve as transitional or buffer areas between residential and commercial districts, and which also may contain institutional, non-profit, embassy/chancery, and office-type uses. Zoning regulations for these areas ~~(which currently include the SP-1 and SP-2 zones)~~ should **enhance neighborhood character and** ~~ensure that development is harmonious with its surroundings,~~ **consider** ~~achieves~~ appropriate height and density transitions **in new developments,** ~~and protects neighborhood character.~~ 311.6

Churches and other religious institutions are an important part of the fabric of the city's neighborhoods.

## Draft Amendments

311.7 *Policy LU-2.3.5: Institutional Uses*

Recognize the importance of institutional uses, such as private schools, child care facilities, and similar uses, to the economy, character, history, livability, and future of Washington, DC and its residents.~~the District of Columbia.~~  
~~Ensure that~~W~~hen such uses are permitted in residential neighborhoods, their~~  
~~y are~~ designed and operationed in a manner that is~~should be~~ sensitive to neighborhood issues and neighbors'~~that maintains~~ quality of life. Encourage institutions and neighborhoods to work proactively to address issues such as ~~traffic~~transportation and parking, hours of operation, outside use of facilities, and facility expansion. 311.7

311.8 *Policy LU-2.3.6: Places of Worship and other Religious Facilities*

Recognize places of worship and other religious facilities as an ongoing, important part of the fabric of the city's neighborhoods. Work proactively with the faith-based community, residents, ANCs, and neighborhood groups to address issues associated with these facilities' transportation needs, operations, and expansion, so that existing and new religious facilities may be sustained as neighborhood anchors and a source of spiritual guidance~~for District residents.~~  
Recognize also that places of worship or religious assembly, and some other religious facilities or institutions, are accorded important federal constitutional and statutory protections under the First Amendment (U.S. Const. Amend. I) and the Religious Land Use and Institutionalized Persons Act of 2000, approved September 22, 2000 (114 Stat. 803; 42 U.S.C. 2000cc). The missions of many religious institutions involve service to the poor, and institutions offer important services such as providing food banks, meals, clothing, counseling services, shelter and housing. 311.8

311.9 *Policy LU-2.3.7: Non-Conforming Institutional Uses*

Carefully control and monitor institutional uses that do not conform to the underlying zoning to promote~~ensure their~~ long-term compatibility. In the event such institutions~~uses~~ are sold or cease to operate,~~as institutions,~~ encourage conformance with existing zoning and continued compatibility with the neighborhood. 311.9

311.10 *Policy LU-2.3.8: Non-Conforming Commercial and Industrial Uses*

Limit~~Reduce the number of~~ nonconforming uses in residential areas,~~particularly those uses~~ that generate noise, truck traffic, odors, air and water pollution, and other adverse effects. Consistent with the zoning regulations, limit the expansion of such uses and fully enforce regulations regarding their operation to avoid harmful impacts on their surroundings. 311.10

## Draft Amendments

311.11 *Policy LU-2.3.9: Transient Accommodations in Residential Zones*

Continue to distinguish between transient uses – such as hotels, bed and breakfasts, and inns – and permanent residential uses such as homes and apartments in the District’s Zoning Regulations. The development of new hotels on residentially zoned land should continue to be prohibited, ~~incentives for hotels (such as the existing Hotel Overlay Zone) should continue to be provided on commercially zoned land,~~ and owner occupancy should continue to be required for transient accommodations in residential zones, **consistent with applicable laws. Short term housing for persons receiving social services is outside the scope of this policy’s prohibition.** 311.11

311.12 *Policy LU-2.3.10: Conversion of Housing to Guest Houses and Other Transient Uses*

Control the conversion of **entire** residences to guest houses, bed and breakfast establishments, clinics, and other non-residential or transient uses. Zoning regulations should continue to allow larger bed and breakfasts and small inns within residential zones through the Special Exception process, with care taken to avoid the proliferation of such uses in any one neighborhood. 311.12

Please refer to Policy 2.4.11 of this Element for additional guidance on hotel uses and the need to address their impacts.

311.13 *Policy LU-2.3.11: Home Occupations*

Maintain appropriate regulations (including licensing requirements) to address the ~~growing~~ trend toward home occupations, accommodating such uses but ensuring that they do not ~~negatively impact~~ **hurt** residential neighborhoods. 311.13

**NEW** ***Policy: Arts and Culture Uses in Neighborhoods***

**Recognize the importance of low-profile, neighborhood-serving arts and culture as an asset for community preservation and building. Encourage the preservation or expansion of arts and culture in discretionary review of development projects.**

**Please refer to the Arts and Culture Element for additional guidance.**

311.14 ~~*Action LU-2.3.A: Zoning Changes to Reduce Land Use Conflicts in Residential Zones*~~

## Draft Amendments

~~As part of the comprehensive rewrite of the zoning regulations, develop text amendments which:~~

- ~~a. Expand buffering, screening, and landscaping requirements along the edges between residential and commercial and/or industrial zones;~~
- ~~b. More effectively manage the non-residential uses that are permitted as a matter of right within commercial and residential zones in order to protect neighborhoods from new uses which generate external impacts;~~
- ~~c. Ensure that the height, density, and bulk requirements for commercial districts balance business needs with the need to protect the scale and character of adjacent residential neighborhoods;~~
- ~~d. Provide for ground-level retail where appropriate while retaining the residential zoning along major corridors; and~~
- ~~e. Ensure that there will not be a proliferation of transient accommodations in any one neighborhood.~~ **Completed – See Implementation Table.** 311.14

### 311.15 *Action LU-2.3.B: Analysis of Non-Conforming Uses*

Complete an analysis of non-conforming commercial, industrial, and institutional uses in ~~the District's~~ residential areas. Use the findings to identify the need for appropriate actions, such as zoning text or map amendments and relocation assistance for problem uses. 311.15

## 312 **LU-2.4 NEIGHBORHOOD COMMERCIAL DISTRICTS AND CENTERS 312**

312.1 Commercial uses and local public facilities are an essential part of the District's neighborhoods. Many of these uses are clustered in well-defined centers that serve as the "heart" of the neighborhood. These areas support diverse business, civic, and social activities. Each center reflects the identity of the neighborhood around it through the shops and establishments it supports and the architecture and scale of its buildings. They are also often connecting points for public transit lines—in fact, many originated around streetcar stops and continue to be important ~~bus transfer~~ transit points today. 312.1

312.2 Since 2006, the District has experienced significant population growth with the emergence of new neighborhoods and revitalization of existing ones. Growth of commercial centers has favored walkability and a retail mix led by food establishments and neighborhood shopping options. Residential growth has also spurred local commercial growth, buoying the success of more commercial centers, alleviating the District's longstanding retail gap. These changes have reshaped the retail landscape. Established retail areas have new competition while new opportunities emerged in underutilized centers. Commercial centers in neighborhoods provide amenities to residents, help to define public life, and provide community anchors and places for social interaction. ~~Many District neighborhoods, particularly those~~

## Draft Amendments

~~on the east side of the city, lack well-defined centers or have centers that struggle with high vacancies and a limited range of neighborhood-serving businesses. Greater efforts must be made to attract new retail uses to these areas by improving business conditions, upgrading storefronts and the street environment, and improving parking and pedestrian safety and comfort. The location of new public facilities in such locations, and the development of mixed use projects that include upper story housing, can encourage their revival.~~

312.2

**NEW**

In 2012, OP developed the DC Vibrant Retail Streets Toolkit to help community and business leaders maximize the potential of their commercial centers with a roadmap based on extensive market research. The most important factor for successful commercial districts is support from a management organization such as a business improvement district, Main Street, merchants' association, or other community group. Management organizations present a unified identity and efficiently communicate the center's interests and needs.

**NEW**

The structure of retail space is another important factor. Retail space is most likely to be successful when it is contiguous with other retail spaces, ceilings are at least 12 feet high, storefronts are transparent, and sidewalks are at least 8 feet wide. Each commercial center has its own market position based on numerous factors including the characteristics of the residential and daytime populations; function and composition of nearby centers; and accessibility. The type of retail mix and amount of space that can be supported depends on a center's market position which can change by increasing housing and jobs in or near the center and/or increasing access to the center.

**NEW**

Improving access to neighborhood commercial centers for pedestrians, transit riders, bicyclists, and drivers is an important factor for successful retail. Pedestrian access is the most important accessibility factor for all commercial centers because it is the common thread that connects retail space with patrons using all other modes.

**NEW**

Curbside management is another major factor for successful commercial areas. Manage the curbside of streets in commercial centers to promote greater access and turnover for customers. Curbside management may be done through strategies such as adjusting parking prices and time limits. Curbside lanes are used for multiple purposes, including parking, loading, bicycle lanes, and transit movements. All such uses should be carefully considered when determining how to manage access in each commercial center. Additionally, management organizations should manage off-street parking in commercial centers to promote shared parking among different uses at different times of day and days of the week.

## Draft Amendments

- 312.3 Even the most successful neighborhood centers ~~in the District~~ must deal with land use conflicts. Excessive concentrations of bars, liquor stores, fast-food outlets, convenience stores, and similar uses are causes of concern in almost every part of the city. Commercial parking demand affects nearby residential streets around many centers. In some locations, commercial and residential rear yards abut one another, causing concerns over rodents, odors, noise, shadows, view obstruction, and other impacts. Effective zoning and buffering requirements are important to address such concerns while accommodating growth, enhancing local amenities, and ~~protect~~ respecting neighborhood character. Zoning ~~overlays have been adopted~~ has been used in some commercial districts to limit the range of allowable uses and reduce the likelihood of external impacts. 312.3
- 312.4 Of course, not all commercial uses occur in defined centers. Many ~~District~~ thoroughfares are lined with “strip” commercial development, much of it auto-oriented and not particularly focused on residents of the adjacent neighborhoods. Activities such as auto dealerships and repair services, motels, and similar uses, can be important contributors to the ~~District’s~~ economy. Again, zoning regulations ~~should establish where these uses are appropriate and~~ should set buffering and screening requirements and other standards which improve the compatibility of such uses with their surroundings. 312.4
- 312.5 ***Policy LU-2.4.1: Promotion of Commercial Centers***  
Promote the vitality ~~of the District’s~~ commercial centers and provide for the continued growth of commercial land uses to meet the needs of ~~District~~ residents, expand employment opportunities for ~~District~~ residents, accommodate population growth, and sustain the city’s role as the center of the metropolitan area. Commercial centers should be inviting and attractive places, and should support social interaction and amenities ~~ease of access~~ for nearby residents. 312.5
- 312.6 ***Policy LU-2.4.2: Hierarchy of Commercial Centers***  
Maintain and reinforce a hierarchy of neighborhood, multi-neighborhood, regional, and main street commercial centers in the District. Activities in each type of center should reflect the center’s ~~its~~ intended role and market area, as defined in the Framework Element. Established centers should be expanded in areas where the existing range of goods and services is insufficient to meet community needs. 312.6
- 312.7 ***Policy LU-2.4.3: Regional Centers***  
Support and enhance the District’s regional commercial centers to help serve area shopping needs that are not met Downtown. Permit the District’s

## Draft Amendments

two established regional commercial centers, at Georgetown and Friendship Heights, to develop and evolve in ways which are compatible with other land use policies, including those for accommodating population growth and increasing affordable housing, especially along corridors, strengthening commercial vitality, maintaining stable neighborhoods, mitigating negative environmental impacts, managing parking, and minimizing adverse ~~traffic-~~transportation impacts. ~~Likewise~~Promote equitable access to regional shopping by, encouraging the continued development of the emerging regional centers at Minnesota-Benning and Hechinger Mall in a manner that is consistent with other policies in the Comprehensive Plan. 312.7

312.8 ***Policy LU-2.4.4: Heights and Densities in Regional Centers***

~~Maintain~~Promote heights and densities in established and proposed regional centers which are appropriate to the scale and function of development in adjoining communities and ~~which step down~~transition to adjacent residential areas, and maintain or develop buffer areas for neighborhoods exposed to increased commercial densities. 312.8

312.9 ***Policy LU-2.4.5: Encouraging Nodal Development***

Discourage auto-oriented commercial “strip” development and instead encourage pedestrian-oriented “nodes” of commercial development at key locations along major corridors. Zoning and design standards should ensure that the height, mass, and scale of development within nodes respects the integrity and character of surrounding residential areas and does not unreasonably impact them. 312.9

312.10 ***Policy LU-2.4.6: Scale and Design of New Commercial Uses***

Develop ~~Ensure that~~ new uses within commercial districts ~~are developed~~ at a height, mass, scale and design that is appropriate for a growing, densifying city, and that is compatible with surrounding areas. 312.10

312.11 ***Policy LU-2.4.7: Location of Night Clubs and Bars***

Provide zoning and alcoholic beverage control laws that ~~discourage the excessive concentration and~~encourage a mix of ground floor uses in commercial areas creating stronger retail environments and minimizing potential negative effects of liquor licensed establishments (e.g., night clubs and bars) in neighborhood commercial districts and adjacent residential areas. New uses that generate late night activity and large crowds should be ~~located away from low and moderate density residential areas and should instead be concentrated~~prioritized Downtown, in designated arts or entertainment districts, and in areas where there is a limited residential population nearby.

## Draft Amendments

312.11

312.12 ***Policy LU-2.4.8: Addressing Commercial Parking Impacts***

~~Ensure that the District's~~ ~~Z~~ zoning regulations **should** consider the ~~traffic-~~ **transportation** and parking impacts of different commercial activities, and include provisions to mitigate the parking demand and congestion problems that may result as new development occurs, especially as related to loading and goods delivery. 312.12

*Please refer to the Transportation Element, Section 3.2 for additional policies and actions related to parking.*

312.13 ***Policy LU-2.4.9: High-Impact Commercial Uses***

~~Ensure that the District's zoning regulations~~ ~~L~~ limit the location and proliferation of fast food restaurants, sexually-oriented businesses, late night alcoholic beverage establishments, 24-hour mini-marts and convenience stores, and similar high-impact commercial establishments that generate excessive late night activity, noise, or otherwise affect the quality of life in nearby residential neighborhoods. 312.13

312.14 ***Policy LU-2.4.10: Use of Public Space within Commercial Centers***

Carefully manage the use of sidewalks and other public spaces within commercial districts to avoid pedestrian obstructions and to provide an attractive and accessible environment for shoppers. **Continue to encourage the identification and transition of excess public right of way into temporary or permanent plazas that contribute to social interaction within commercial centers.** Where feasible, the development of outdoor sidewalks cafes, flower stands, and similar uses which “animate” the street should be encouraged. Conversely, the enclosure of outdoor sidewalk space with permanent structures should generally be discouraged. 312.14

312.15 ***Policy LU-2.4.11: Hotel Impacts***

Manage the impacts of hotels on surrounding areas, particularly in the Near Northwest neighborhoods where large hotels adjoin residential neighborhoods. Provisions to manage truck movement and deliveries, overflow parking, tour bus parking, and other impacts associated with hotel activities should be developed and enforced. 312.15

Please refer to Policies 2.3.9 and 2.3.10 of this Element for additional guidance on hotel uses within residential neighborhoods.

## Draft Amendments

312.16 *Policy LU-2.4.12: Monitoring of Commercial Impacts*

~~Maintain a range of M~~monitoring, inspection, and enforcement local planning, building, zoning, transportation, health, alcoholic beverage control, and other District rules and regulations ~~programs~~ for commercial areas ~~to ensure that activities are occurring in accordance with local planning, building, zoning, transportation, health, alcoholic beverage control, and other District rules and regulations. Prompt and effective action should be taken in the event non-compliance with these rules and regulations is observed.~~ 312.16

312.17 *Policy LU-2.4.13: Commercial Uses Outside Designated Centers*

~~Recognize that N~~ot all commercial uses can be appropriately sited within designated neighborhood, multi-neighborhood, and regional centers. For example, automobile sales, nurseries, building supply stores, large night clubs, hotels, and similar uses may require ~~highway-oriented~~ locations near parking and major roads. ~~The District should R~~etain and support such uses and accommodate them on appropriately located sites. 312.17

312.18 *Action LU-2.4.A: Evaluation of Commercial Zoning*

As part of each Small Area Plan, conduct an evaluation of commercially zoned areas to assess the appropriateness of existing zoning designations. This assessment should consider:

- a. The heights, densities and uses that could occur under existing zoning; and
- b. The suitability of existing zoning given the location and size of each area, the character of adjacent land uses, the relationship to other commercial districts in the vicinity, transportation and parking attributes, proximity to adjacent uses, and the designation on the Future Land Use Map. 312.18

312.19 *Action LU-2.4.B: Zoning Changes to Reduce Land Use Conflicts in Commercial Zones*

As part of the comprehensive rewrite of the zoning regulations, consider text amendments that:

- a. More effectively control the uses which are permitted as a matter-of- right in commercial zones;
- b. Avoid the excessive concentration of particular uses with the potential for adverse effects, such as convenience stores, fast food establishments, and liquor-licensed establishments; and
- c. Consider performance standards to reduce potential conflicts between certain incompatible uses Completed – See Implementation Table. 312.19

## Draft Amendments

312.20

***Action LU-2.4.C: Mixed Use District with Housing Emphasis***

Develop a new mixed use zoning district, to be applied principally on land that is currently zoned for non-residential uses (or that is now unzoned), which limits commercial development to the ground floor of future uses and requires residential use on any upper stories. Consider the application of this designation to Metrorail stations and corridor streets that may currently have high commercial vacancies or an excess supply of commercial space, including those areas designated as “Main Street Mixed Use Corridors” and commercial centers on the Generalized Policies Map. **Completed – See Implementation Table.**

312.20

313

**LU-3 BALANCING COMPETING DEMANDS FOR LAND 313**

313.1

This section of the Land Use Element addresses five specific activities that require a greater level of direction than can be covered in the “Neighborhood” policies listed **and** described in the previous sections. These activities are an essential part of the District of Columbia and are vital to the city’s future. Each of these uses presents a unique set of challenges and land use compatibility issues. They include:

- a. Public Works and Industrial Uses, which are essential to government operations and the local economy, but also create external impacts and face displacement for higher value land uses;
- b. Institutional Uses, including places of worship and other religious facilities, that seek vacant land or developed properties for expansion, but where expansion is limited because the properties are hemmed in by adjacent neighborhoods;
- c. Foreign Missions, namely the chanceries and embassies of foreign governments, which seek to locate or expand in some of the city’s most desirable neighborhoods;
- d. Group Homes, Community Based Residential Facilities, and Supportive Housing, which provide for the essential housing and ~~socialization~~ needs of thousands of District residents but may end up concentrated in particular parts of the city; and
- e. Federal Facilities, which often operate in immediate proximity to residential neighborhoods, creating the need for sensitive planning as these uses expand, contract, and implement new security measures. 313.1

314

**LU-3.1 PUBLIC WORKS AND ~~INDUSTRIAL-PRODUCTION,~~ DISTRIBUTION, AND REPAIR (PDR) LAND USES 314**

314.1

Approximately ~~2,000~~ **333** acres of land in the District of Columbia are zoned for industrial uses. ~~The city’s industrial~~ **PDR** areas support a variety of uses, many of which are essential to the delivery of municipal services or which are part of

## Draft Amendments

the business infrastructure that underpins the local economy. Furthermore, PDR businesses and uses create opportunities for entrepreneurship, creativity and innovation, and higher paying jobs than comparable jobs for similar education attainment in economic sectors like retail and healthcare. It is estimated that nine percent of the employment in the District is in PDR industries. These jobs are often accessible to residents with lower education attainment and returning citizens. In 2005, the inventory of private industrial floor space in the city was approximately 13 million square feet. 314.1

**NEW**

Washington, DC's industrial land exists largely because of historical development factors that made certain areas suitable for these uses, or unsuitable for residential and commercial development. Such factors include proximity to rail or water routes needed to transport heavy goods, relative isolation from residential areas, and the effects of noisy or noxious uses and infrastructure. Where these factors remain, PDR facilities are likely to remain an appropriate use of this land. Since much of this land has always been devoted to industrial use, many of the city's prominent examples of historic industrial architecture are located here. Of the 25 properties identified as potentially significant in the DC State Historic Preservation Office's 1991-92 historic resources study of District warehouses and workshops, 16 have received historic designation.

314.2 Some of the municipal activities housed on ~~the city's~~ industrial land include trash transfer and hauling, bus storage and maintenance, vehicle impoundment, police and fire training, street repair and cleaning equipment storage, and water and sewer construction services. Private activities on industrial lands include food and beverage services, laundries, printers, concrete and asphalt batching plants, distribution centers, telecommunication facilities, construction contractors and suppliers, and auto salvage yards, to name only a few. The contribution and necessity of these uses to the ~~city's~~ economy is discussed in the Economic Development Element of the Comprehensive Plan. 314.2

314.3 Given the lenient zoning standards within industrial areas (most of which actually favor commercial uses over industrial uses) as well as the market pressure to provide additional residential housing, much of the ~~city's~~ industrial land supply is at risk. ~~While public works and PDR uses may no longer be logical in some areas given their proximity to Metro or residential areas, proactive measures are needed to sustain them elsewhere.~~ In addition, many of the public works uses that take place on industrial land are not optimally organized, resulting in inefficient use of space. Plans to reorganize and consolidate many of these activities have been developed. The repositioning of these resources results in more effective service delivery, added value to nearby properties, provision of amenities for surrounding neighborhoods, and creation of jobs on land freed up for further public or private investment. 314.3

## Draft Amendments

**NEW**

**To preserve the District’s ability to create, produce, distribute and service goods, it is recommended that the District review the Zoning Code to eliminate uses in PDR zoning that are not related to Production, Distribution, Repair or creative and cultural uses. Hotels, stand-alone commercial uses, stand-alone office, non-technical or trade schools, and residential units are uses that compete for limited land resources and place additional pressure on scarce PDR land.**

314.4 In 2005, the District of Columbia commissioned an analysis of industrial land supply and demand to provide a framework for new land use policies (see text box -citation 314.6). **In 2014, another industrial land study was released by the District of Columbia, *Ward 5 Works: Ward 5 Industrial Land Transformation*. This study furthered the findings in 2005 with particular emphasis on the Upper Northeast area where approximately 50% of the District’s industrial uses are located.** The recommendations of ~~this study~~ **these studies** are incorporated in the policies and actions below. 314.4

314.5 One of the most important findings of the **2005** industrial land use analysis is that there ~~is~~ **was** an immediate unmet need of approximately 70 acres for “municipal-industrial” activities. Facility needs range from an MPD Evidence Warehouse to replacement bus garages for WMATA. Several agencies, including the Architect of the Capitol, indicate that their acreage needs will increase even more in the next ten years. At the same time, ~~there is evidence that~~ efficiencies could be achieved through better site layouts and consolidation of some municipal functions, particularly for vehicle fleet maintenance. The findings provide compelling reasons to ~~protect~~ **preserve** the limited supply of industrial land, and to organize municipal-industrial activities more efficiently. **One example of this approach is showcased in the Department of Public Works (DPW) Campus Master Plan, a study conducted as a recommendation from the 2014 *Ward 5 Works Industrial Land Transformation Study*. The DPW Campus Master Plan aims to consolidate operations and administrative offices to a new state-of-the-art campus at West Virginia Avenue NE that would transform the current site into a neighborhood asset while efficiently utilizing the District-owned industrial land.** 314.5

### **314.6 TAKING A HARD LOOK AT DC’S INDUSTRIAL LANDS 314.6**

The 2005-2006 Industrial Land Use Study classified DC’s industrially zoned lands into four categories:

- a. **Areas for Retention and Reinforcement** have healthy production, distribution, and repair (PDR) uses and have good prospects for hosting such uses in the future.

## Draft Amendments

- b. **Areas for Intensification/Evolution** will continue to be desirable for PDR activities but show patterns of underutilization and opportunities for intensified uses. Some non-PDR activities may take place in these areas in the long-term future.
- c. **Areas for Strategic Public Use** are needed to accommodate municipal and utility needs.
- d. **Areas for Land Use Change** are areas where a move away from PDR uses may be appropriate due to a lack of viable PDR businesses and the desirability of these sites for other uses. In some of these areas, the District may let the market take its course. In others, pro-active measures such as rezoning may be in order.

The District ~~is currently developing~~ **developed** criteria for evaluating rezoning requests which reflect these typologies and further consider the land use, transportation, and environmental context of each site, its unique characteristics, and its potential need for future municipal purposes. 314.6

314.7

***Policy LU-3.1.1: ~~Conservation~~ Preservation of Industrial Land***

Recognize the importance of industrial land to the economy of the District of Columbia, specifically ~~its ability~~ to support public works functions, and accommodate production, distribution, and repair (PDR) activities. ~~Ensure that~~ **Z**oning regulations and land use decisions **should continue to preserve** ~~protect~~ active and viable PDR land uses, while allowing compatible office and retail uses and development under standards established within CM- and M-zoning. Economic development programs should work to retain and permit such uses, ~~in the future~~. 314.7

314.8

***Policy LU-3.1.2: Redevelopment of Obsolete Industrial Uses***

Encourage the redevelopment of outmoded and non-productive industrial sites, such as vacant warehouses and open storage yards, with higher value production, distribution, and repair uses, **including public facilities**, and other activities, which support the core sectors of the District economy (federal government, hospitality, higher education, etc.). 314.8

314.9

***Policy LU-3.1.3: Location of PDR Areas***

Accommodate Production, Distribution, and Repair (PDR) uses— including municipal public works facilities—in areas that are well buffered from residential uses (and other sensitive uses such as schools), easily accessed from major roads and railroads, and characterized by existing concentrations of PDR and industrial uses. Such areas are generally designated as “PDR” on the Comprehensive Plan’s Future Land Use Map. 314.9

## Draft Amendments

314.10 *Policy LU-3.1.4: Rezoning of Industrial Areas*

Allow the rezoning of industrial land for non-industrial purposes only when the land can no longer viably support industrial or PDR activities, ~~or~~ is located such that industry cannot co-exist adequately with adjacent existing uses, or where such rezoning is called for by a master plan aimed at using land more effectively and creating opportunities for affordable housing, people experiencing homelessness, and jobs for DC residents. Examples include land in the immediate vicinity of Metrorail stations, sites within historic districts, ~~and~~ small sites in the midst of stable residential neighborhoods, and District-owned public works properties. In the event such rezoning results in the displacement of active uses, assist these uses in relocating to designated PDR areas. 314.10

314.11 *Policy LU-3.1.5: Mitigating Industrial Land Use Impacts*

Mitigate the adverse impacts created by industrial uses through a variety of measures, including buffering, site planning and design, strict environmental controls, performance standards, and the use of a range of industrial zones that reflect the varying impacts of different kinds of industrial uses. 314.11

314.12 *Policy LU-3.1.6: Siting of Industrial-Type Public Works Facilities*

Use performance standards (such as noise, odor, and other environmental controls), minimum distance requirements, and other regulatory and design measures to promote ~~ensure~~ the compatibility of industrial-type public works facilities such as trash transfer stations with surrounding land uses. Improve the physical appearance and screening of such uses and strictly regulate operations to reduce the incidence of land use conflicts, especially with residential uses. 314.12

314.13 *Policy LU-3.1.7: Cottage Industries and Makers*

Support low-impact “cottage industries” and “~~home-grown-businesses~~ makers” in neighborhood commercial districts and on appropriate industrial lands. Maintain zoning regulations that ~~strictly~~ regulate such uses in residential areas, ~~in order~~ to avoid land use conflicts and negative business-related impacts, while allowing residents to explore low-impact entrepreneurship in or nearby their homes. 314.13

314.14 *Policy LU-3.1.8: ~~Co-Location of~~ Optimizing Municipal Public Works Functions*

~~Improve the performance of existing industrial areas through zoning regulations and city policies which encourage the more efficient use of land, including the~~

## Draft Amendments

~~co-location of municipal functions (such as fleet maintenance, record storage, and warehousing) on consolidated sites rather than independently managed scattered sites~~

Strategically manage District-owned land in industrial areas to improve operational capacity, use land effectively, incorporate principles of environmental stewardship and sustainability, create community amenities and job opportunities, and serve as a catalyst for revitalizing nearby neighborhoods. This approach may include the consolidation of public works activities on a smaller number of sites, enabling vacated sites to be repurposed for new job-generating activities. 314.14

See also Infrastructure Element, Section IN-3.2.

314.15 ~~**Policy LU-3.1.9: Central Management of Public Works**  
Promote the central management of municipal public works activities to avoid the displacement of essential government activities and the inefficiencies and increased costs resulting from more distant locations and future land acquisition needs. Consider “land banking” appropriately located District owned properties and vacant sites to accommodate future municipal space needs.~~ 314.15

314.16 Policy LU-3.1.10: Land Use Efficiency Through Technology  
Encourage the more efficient use of PDR land through the application of technologies which reduce acreage requirements for public works. Examples of such applications include the use of diesel-electric hybrid or electric buses (which can be accommodated in multi-level garages), using distributed power generation rather than large centralized facilities, and emphasizing green building technologies to reduce infrastructure needs. 314.16

**NEW** **Policy LU-3.1.11: Infrastructure Adequacy**

The adequacy and resiliency of electrical power and other infrastructure serving growing and existing neighborhoods are integral to the success of the land use goal. Utility infrastructure must develop in tandem with proposed developments to support the needs of the community when planning for and approving proposed development or conserving the architectural landscape of neighborhoods. In furtherance of conserving, enhancing, and revitalizing neighborhoods, such measures may include promoting the upgrade of existing infrastructure, supporting new substation construction, installing green building measures, or facilitating underground efforts.

Please see Infrastructure Element for additional policies and actions related to infrastructure adequacy.

314.17 *Action LU-3.1.A: Industrial Zoning Use Changes*

## Draft Amendments

Provide a new zoning framework for industrial land, including:

- Prohibiting high impact "heavy" industries in the ~~C-M~~**PDR** zones to reduce the possibility of land use conflicts;
- Prohibiting certain civic uses that detract from the industrial character of C-M areas and that could ultimately interfere with business operations;
- Requiring special exceptions for potentially incompatible large retail uses in the C-M zone to provide more control over such uses without reducing height and bulk standards. **Retail uses should not displace existing PDR uses or foreclose opportunities for future PDR uses. Where appropriate, encourage retail or commercial uses that are accessory to PDR uses as a way to activate ground floors.**
- Limiting non-industrial uses in the M zone to avoid encroachment by uses which could impair existing industrial and public works activities (such as trash transfer);
- ~~Creating an IP (industrial park) district with use and bulk regulations that reflect prevailing activities; and~~
- Creating a Mixed Use district where residential, commercial, and lesser-impact PDR uses are permitted, thereby accommodating live- work space, artisans and studios, and more intensive commercial uses.

Once these changes have been made, **update zoning as appropriate.** ~~pursue the rezoning of selected sites in a manner consistent with the policies of the Comprehensive Plan.~~ The zoning changes should continue to provide the flexibility to shift the mix of uses within historically industrial areas and should not diminish the economic viability of existing industrial activities or the other compatible activities that now occur in PDR areas. 314.17

314.18 ***Action LU-3.1.B: Industrial Land Use Compatibility***

During the revision of the Zoning Regulations, develop performance standards and buffering guidelines to improve edge conditions where industrial uses abut residential uses, and to address areas where residential uses currently exist within industrially zoned areas. **Completed – See Implementation Table.**

314.18

314.19 ***Action LU-3.1.C: Joint Facility Development***

Actively pursue intergovernmental agreements to develop joint facilities for District and federal agencies (such as DPR and ~~National Park Service~~**PS**); District and transit agencies (DPW and WMATA); ~~and multiple public utilities (Pepeo and WASA), and multiple District agencies performing different public works functions.~~ **Completed – See Implementation Table.** 314.19

## Draft Amendments

314.20 ***Action LU-3.1.D: Inventory of Housing In Industrial Areas***

Compile an inventory of existing housing units within industrially zoned areas to identify pockets of residential development that should be rezoned (to mixed use or residential) ~~in order to protect~~ **preserve** the housing stock. 314.20

**NEW** ***Action LU-3.1.D: Department of Public Works Colocation and Campus***

**Actively pursue funding resources or allocation for the implementation of the West Virginia Avenue Department of Public Works Campus Master Plan study that was conducted by District agencies in 2015.**

**NEW** ***Action LU-3.1.E: Ward 5 Works Industrial Land Transformation Study***

**Implement the recommendations provided in the Ward 5 Works Industrial Land Transformation Study released in 2014.**

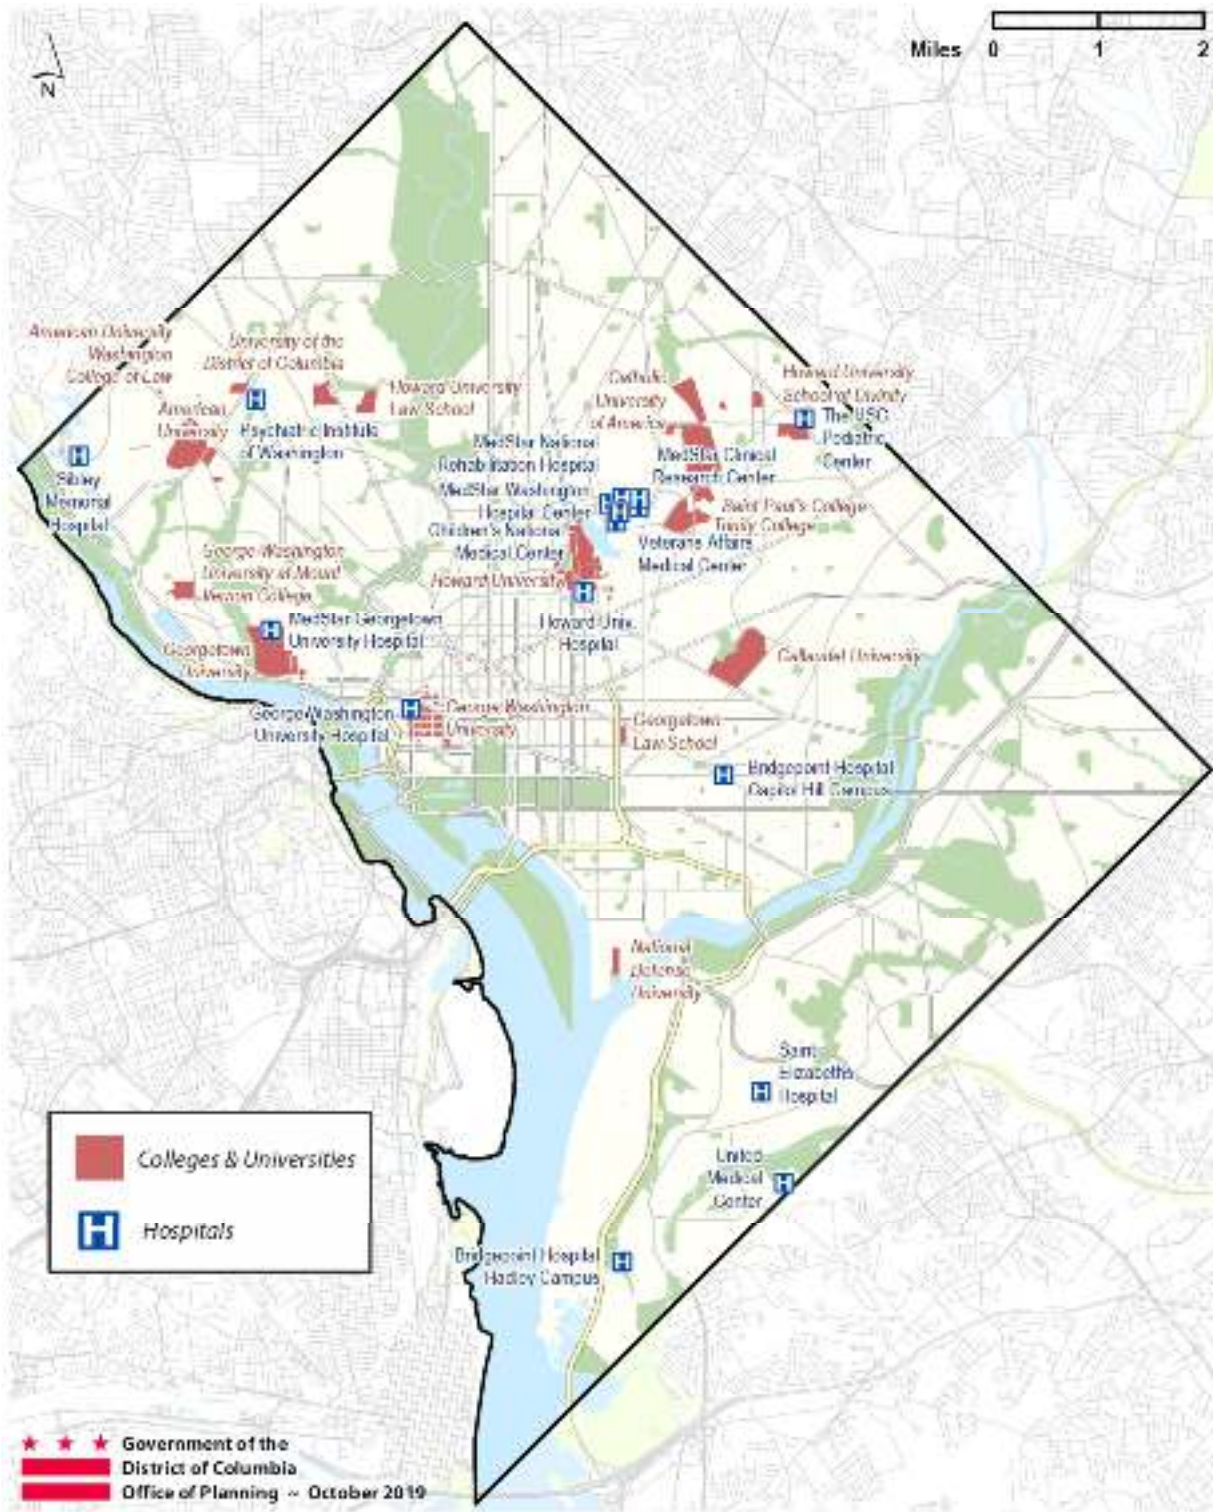

**315 LU-3.2 INSTITUTIONAL USES 315**

315.1 Institutional uses occupy almost 2,300 acres—an area larger than all of the city’s retail, office, and hotel uses combined. These uses include colleges and universities, private schools, childcare facilities, places of worship and other religious facilities, hospitals, private and non-profit organizations, and similar entities. 315.1

315.2 The District is home to about a dozen colleges and universities, enrolling more than ~~8~~**75**,000 students. There are also nearly 70 non-local college and university programs that occupy space in the city. The District contains more than a dozen hospitals, some located on the campuses of its universities and others occupying their own campuses or federal enclaves. Hundreds of non-profit and private institutions also operate within the city, ranging from private schools and seminaries to historic home museums and the headquarters of leading international organizations. Major institutional uses are shown on Map 3.6. 315.2

Draft Amendments

315.3 Map 3.6: Colleges, Universities, and Hospitals

## Draft Amendments

315.4 ~~The city's~~ Institutions make an important contribution to the District economy and are an integral part of Washington's landscape and history. The colleges and universities alone ~~spend over \$1.5 billion dollars annually and~~ employ ~~21,000~~ 29,682 workers. Through partnerships with government and private industry, ~~the city's~~ museums, higher education, and health care institutions provide services and resources to the community that could not possibly be provided by government alone. 315.4

**NEW** **Private institutions are stewards of historic and architecturally distinguished campuses. Several of these campuses are already recognized by historic designations, but other historically-significant campuses are not.**

315.5 The growth of private institutions has generated significant concern in many ~~of the city's~~ neighborhoods. These concerns relate both to external impacts such as traffic and parking, and to broader concerns about the character of communities where institutions are concentrated or expanding. 315.5  
*Please see the Educational Facilities Element for additional policies and actions related to colleges and universities.*

315.6 ***Policy LU-3.2.1: Transportation Impacts of Institutional Uses***

Support ongoing efforts by ~~District~~ institutions to mitigate their traffic and parking impacts by promoting ridesharing, carpooling, public transportation, shuttle service and bicycling; providing on-site parking; and undertaking other transportation demand management measures. 315.6

315.7 ***Policy LU-3.2.2: Corporate Citizenship***

Support continued "corporate citizenship" among ~~the city's~~ large institutions, including ~~its~~ colleges, universities, hospitals, private schools, and non-profits. Given the large land area occupied by these uses and their prominence in the community, ~~the city's~~ institutions (along with the District itself) should be encouraged to be role models for smaller employers in efforts to improve the ~~city's~~ physical environment. This should include a continued commitment to high quality architecture and design on local campuses, expanded use of "green building" methods and low impact development, and the adaptive reuse and preservation of historic buildings. 315.7

**Please see Economic Development Element for additional policies and actions related to encouraging corporations to support the local economy through hiring and contracting.**

## Draft Amendments

315.8 *Policy LU-3.2.3: Non-Profits, Private Schools, and Service Organizations*

**Plan, design, and manage** ~~Ensure that~~ large non-profits, service organizations, private schools, seminaries, colleges and universities, and other institutional uses that occupy large sites within residential areas ~~are planned, designed, and managed~~ in a way that minimizes objectionable impacts on adjacent communities. ~~The Z~~ zoning regulations should **not permit** ~~ensure that the~~ expansion of these uses ~~is not permitted~~ if the quality of life in adjacent residential areas is significantly adversely affected **without commensurate benefits.** 315.8

315.9 *Action LU-3.2.A: Zoning Actions for Institutional Uses*

Complete a study of residential zoning requirements for institutional uses other than colleges and universities. Determine if additional review by the Board of Zoning Adjustment or Zoning Commission should be required in the event of a change in use. Also determine if the use should be removed as an allowable or special exception use, or made subject to additional requirements. **(Completed – See Implementation Table)** 315.9

315.10 *Action LU-3.2.B: Special Exception Requirements for Institutional Housing*

Amend the zoning regulations to require a special exception for dormitories, rooming houses, boarding houses, fraternities, sororities, and similar uses in the R-4 zoning district. **(Completed – See Implementation Table)** 315.10

316 **LU-3.3 FOREIGN MISSIONS 316**

316.1 There are **over 170** ~~169~~ countries across the globe with foreign missions in the District of Columbia. These missions assist the US government in maintaining positive diplomatic relations with the international community. By international treaty, the US government is obligated to help foreign governments in obtaining suitable facilities for their diplomatic missions. This obligation was reinforced through the Foreign Missions Act of 1982, which established an Office of Foreign Missions within the Department of State and empowered the Secretary of State to set criteria relating to the location of foreign missions in the District. As noted in the text box at left, foreign missions are housed in many different types of buildings, ranging from row houses and mansions to custom-designed office buildings. 316.1

316.2 The number of Foreign Missions in the city **is dynamic based on geopolitical events** ~~increased 27 percent between 1983 and 2003, in part fueled by the breakup of the Soviet Union.~~ While an increase of this scale is not expected in the near future, some growth is likely. In addition, some of the existing missions

## Draft Amendments

are likely to relocate as they outgrow their facilities, respond to increased security requirements, and move beyond their traditional diplomatic functions. The Federal Elements of the Comprehensive Plan indicate that sites for as many as 100 new and relocated chanceries may be needed during the next 25 years. The availability of sites that meet the needs of foreign missions within traditional diplomatic areas is limited and the International Chancery Center on Van Ness Avenue has no available sites remaining. **A portion of the Walter Reed campus is planned for chancery use, but** ~~A~~ additional areas may be needed for chancery use and it may be necessary for foreign missions to look beyond traditional diplomatic enclaves. 316.2

## 316.3

**WASHINGTON'S FOREIGN MISSIONS 316.3**

The facilities that house diplomatic functions in Washington are commonly referred to as embassies. To differentiate the functions that occur in buildings occupied by foreign missions, a variety of designations are used:

**Chanceries** are the principal offices used by a foreign mission; **colloquially referred to as embassies.**

**Chancery annexes** are used for diplomatic purposes in support of the mission, such as cultural attaches or consular operations.

**Ambassadors's residences** are the official homes of ambassadors or chiefs of missions.

Many foreign governments occupy chanceries, chancery annexes, and ambassador's residences in more than one location. In 2004, the federal government indicated there were 483 separate facilities in the city serving these functions.

Since 1982, chanceries have been allowed to locate in most of Washington's non-residential zone districts as a matter of right. They are also permitted in ~~the city's~~ higher-density residential and special purpose (SP) zones, and in less dense residential areas covered by a diplomatic overlay district.

Historically, ~~the city's~~ chanceries have concentrated in Northwest Washington, particularly along Massachusetts Avenue ("Embassy Row"), and in the adjacent Sheridan-Kalorama and Dupont Circle neighborhoods. There are also 16 chanceries on a large federal site adjacent to the Van Ness/ UDC Metro station, specifically created to meet the demand for foreign missions. 316.3

## Draft Amendments

- 316.4 The Foreign Missions Act of 1982 established procedures and criteria governing the location, replacement, or expansion of chanceries in the District of Columbia. The Act identifies areas where foreign missions may locate without regulatory review (“matter of right” areas), including all areas zoned commercial, industrial, waterfront, or mixed use. These areas are located in all quadrants of the city, and include large areas south of the National Mall and east of the Anacostia River. The 1982 Act also identifies areas where foreign missions may locate subject to disapproval by the District of Columbia Foreign Missions Board of Zoning Adjustment (FMBZA). These include areas zoned medium-high and high-density residential, special purpose, and areas within a Diplomatic overlay zone. 316.4
- 316.5 As a result of the analysis accomplished in support of the Foreign Missions Act, a methodology was developed in 1983 to determine the most appropriate areas for foreign missions to locate, subject to FMBZA review. The 1983 methodology allows foreign missions to locate in low and moderate density city blocks (“squares”) in which one-third or more of the area is used for office, commercial, or other non-residential uses. In some cases, a consequence of the square-by-square determination has been an unanticipated increase in chanceries. 316.5
- 316.6 ~~In 2003, the National Capital Planning Commission completed a further analysis of chancery siting standards, concluding that zoning regulations and maps could be revised to more compatibly accommodate foreign missions in the future. The Federal Elements of the Comprehensive Plan suggest that new chanceries be encouraged along South Capitol Street, Massachusetts Avenue (within Reservation 13), and the 16<sup>th</sup> Street corridor, and that a new foreign mission center be developed on the Armed Forces Retirement Home or along South Capitol Street. Since the time the Federal Elements were adopted, Walter Reed Hospital also has been discussed as a possible site.~~ In 2015, the National Capital Planning Commission (NCPC) updated the Federal Elements of the Comprehensive Plan including the Foreign Missions and International Organization Element. The Foreign Mission Element recognizes “A key challenge with locating chanceries is balancing the need to plan secure locations for diplomatic activities while being sensitive to residential neighborhoods.” The Foreign Mission Element acknowledges the State Department is preparing a master plan for a new foreign mission center to be developed on the former Walter Reed Medical Center site and suggests that new chanceries be encouraged to locate first in areas where their use is considered a matter of right under local zoning. Working with NCPC and the State Department clarified zoning regulations were written regarding applications to locate, replace, or expand a chancery use not otherwise permitted as a matter-of-right. The new zoning standards were adopted as part of the 2016 amendments to the Zoning Regulations. 316.6

## Draft Amendments

316.7 ***Policy LU-3.3.1: Chancery Encroachment in Low Density Areas***

Encourage foreign missions to locate their chancery facilities ~~in areas~~ where adjacent existing and proposed land uses are compatible (e.g., office, commercial, and mixed use), taking special care to respecting ~~protecting~~ the integrity of residential areas. Discourage the location of new chanceries in any area that is essentially a residential use area, to the extent consistent with the Foreign Missions Act. 316.7

316.8 ***Policy LU-3.3.2: Target Areas for New Chanceries***

Encourage the development of new chancery facilities in locations where they would support ~~the District's~~ neighborhood revitalization and economic development goals, particularly on federal enclaves and ~~in the portion of the city~~ east of 16<sup>th</sup> Street NW. Work with the Department of State, the National Capital Planning Commission and other organizations to ~~provide incentives for~~ encourage foreign missions to locate in these areas. 316.8

316.9 ***Policy LU-3.3.3: Compatibility of New Chanceries***

Promote the design and maintenance of chanceries in a manner that respects- ~~protects the city's~~ open space and historic resources, mitigates impacts on nearby properties, is compatible with the scale and character of its surroundings, and enhances Washington's international image as a city of great architecture and urban design. 316.9

316.10 ***Action LU-3.3.A: Modifications to the Diplomatic Overlay Zone***

Work with the National Capital Planning Commission and Department of State to develop a new methodology to determine appropriate additional chancery development areas; and revise the mapped diplomatic areas, reflecting additional areas where foreign missions may relocate. The methodology and zoning map revisions should avoid concentration of chanceries in low density neighborhoods, to the extent consistent with the Foreign Missions Act. Completed – See Implementation Table. 316.10

316.11 ***Action LU-3.3.B: Foreign Mission Mapping Improvements***

On an ongoing basis, accurately inventory ~~Improve the mapping of~~ foreign mission locations, distinguishing ~~in the city, ensuring that they are accurately inventoried and that~~ chanceries, ambassador's residences, and institutional land uses, ~~are appropriately distinguished.~~ 316.11

## Draft Amendments

- 316.12 ~~*Action LU-3.3.C: New Foreign Missions Center*~~
- ~~Support the development of a new foreign missions center on federal land in the District of Columbia. 316.12~~
- 317 ~~**LU 3.4 GROUP HOUSING 317**~~
- 317.1 ~~Group housing accommodates District residents with a wide variety of special needs, including persons with physical and mental disabilities, terminal illnesses, foster children, parolees, recovering substance abusers, victims of domestic violence, the elderly, and others. Such homes have become increasingly common due to the closure of large institutions and greater recognition of the social benefits of group living arrangements. Group housing can provide a family-like environment, aid in the development of life skills, and foster the integration of persons with special needs into society. Yet such housing is among the most difficult uses in the city to site due to public concerns about neighborhood impacts. 317.1~~
- 317.2 ~~The District's zoning regulations recognize many types of group housing, including adult rehabilitation homes, community residence facilities, emergency shelters, health care facilities, substance abuser homes, youth rehabilitation homes, and youth and youth residential care homes. Other types of group housing also exist. Their impacts are substantially different depending on their size, location, and the population they serve. 317.2~~
- 317.3 ~~Recognizing the distinction between the different types of group housing is important because different licensing procedures and zoning requirements apply based on the number and characteristics of residents served. These requirements are guided by the federal Fair Housing Act, particularly 1988 Amendments limiting the degree to which zoning may restrict group home location, placement, and operation. Under federal law, all state and local governments are required to make "reasonable accommodation" to house persons with disabilities. Interpretation of this standard has been the subject of litigation in cities across the country for almost two decades. 317.3~~
- 317.4 ~~The District's geographic information system (GIS) includes a partial inventory of group housing in the District; this is shown in Map 3.7. While this is not a complete inventory, it clearly illustrates that such housing is more heavily concentrated in some parts of the city than others. This is the result of a number of factors, including land costs, proximity to supportive services, and the density and character of housing in the city. The District's Zoning Regulations permit most categories of group homes with six residents or less as matter-of-right uses in all residential zones. However, some categories of small group homes—including those for recovering substance abusers and adjudicated felons—are subject to Special Exception requirements from the Board of~~

## Draft Amendments

~~Zoning Adjustment, as well as distance separation standards. Minimum distance standards also apply to youth residential care and community residence facilities with nine to 15 residents. These standards limit the siting of new group homes within 1,000 feet of existing group homes in single-family zones and within 500 feet in moderate and higher density zones. 317.4~~

317.5 ~~The licensing, monitoring, and management of group homes also have been raised as community concerns. Similarly, the need to more effectively involve the community in siting decisions, and to provide better notification of siting requests has been raised. Despite zoning standards, there are still concerns about neighborhoods becoming more institutional in character as group homes are established. There are also concerns about fairness and equity, given the fact that some neighborhoods have many group homes while others have none. Resolving this particular dilemma is complicated by the soaring cost of real estate, which tends to shift demand to the most affordable parts of the city. 317.5~~

317.6 ~~Map 3.7: Locations of Group Homes~~

317.7 ~~In the coming years, the District will strive to locate group homes in a manner that balances neighborhood concerns while meeting the housing needs of all residents. Additional examination of the District's zoning regulations, improvement of zoning definitions, and clearer siting standards for the different categories of group homes are recommended. Increased coordination between the agencies responsible for licensing and monitoring all community housing facilities should be achieved. Greater community involvement, including advisory committees, good neighbor agreements, and more rigorous monitoring procedures, should be used to improve operations and address land use conflicts. 317.7~~

317.8 ~~***Policy LU-3.4.1: Reasonable Accommodation of Group Homes***~~

~~Recognize the importance of group homes to providing a positive, healthy environment for many residents of the District of Columbia. Ensure that the District's planning, zoning, and housing codes make reasonable accommodation for group homes without diminishing the character or fundamental qualities of its residential neighborhoods. 317.8~~

317.9 ~~***Policy LU-3.4.2: Promoting More Equitable Distribution***~~

~~Encourage a more balanced distribution of group housing in the District of Columbia. The concentration of group homes or creation of excessively large group homes in a manner that would threaten the residential character of any one neighborhood should be strictly avoided. Such concentrations are inconsistent with the objective of integrating special needs populations into the~~

## Draft Amendments

~~larger community. Care should be taken to locate particular special needs populations where they can best receive services and support. 317.9~~

317.10 ***Policy LU-3.4.3: Small Group Housing for the Disabled***

~~As required by the federal Fair Housing Act, allow group homes with six or fewer residents (excluding staff or caregivers) serving persons with disabilities in all residential zone districts. Zoning requirements for such homes that are more restrictive than those applying to other residential uses are unlawful and shall not be permitted. 317.10~~

317.11 ***Policy LU-3.4.4: Larger Group Housing and Group Housing Serving Non-Disabled Populations***

~~Permit larger group housing (with seven or more residents) and group homes serving non-disabled persons with special needs (including youth and adult rehabilitation homes) in all residential districts, subject to Board of Zoning Adjustment approval and siting standards that discourage excessive concentration and that comply with federal housing laws. The Special Exception process should be used to ensure public notification and involvement and to establish conditions that improve the compatibility of group homes with surrounding uses. Siting standards for such housing shall be contained in the Zoning Regulations. 317.11~~

317.12 ***Policy LU-3.4.5: Design Compatibility of Group Homes***

~~Encourage the design and appearance of group homes to be consistent with the character of the surrounding neighborhood and to blend with adjacent residences to the maximum extent possible. 317.12~~

317.13 ***Policy LU-3.4.6: Communication on Group Home Operations***

~~Increase coordination and communication between the District, group home operators, and area residents in order to improve operations, address community concerns such as parking and public safety, and more fully integrate group home residents into the community. Consider the use of community advisory boards and task forces to mediate operational and siting issues, including the size of the facility. 317.13~~

317.14 ***Policy LU-3.4.7: Licensing and Group Home Code Compliance***

~~Ensure that the permitting, licensing, monitoring, and operation of group homes meets all applicable codes and standards. Improve enforcement programs to ensure compliance and take prompt, effective action in the event of violations. 317.14~~

## Draft Amendments

317.15 ~~***Policy LU-3.4.8: Public Information On Group Housing Needs***~~

~~Improve public education and information on the need for group housing in the District, and on issues related to their operation and resident needs. 317.15~~

317.16 ~~***Action LU-3.4.A: Clarification of Community Housing Definitions***~~

~~Clarify the definitions of the various types of community housing in the District, and ensure the consistent use of these definitions in all planning, building, and zoning codes and licensing regulations. 317.16~~

317.17 ~~***Action LU-3.4.B: Information on Group Home Location***~~

~~Provide easily accessible information on location and occupancy for all licensed group home facilities in the District. Such information should be accessible via the Internet and also should be available in mapped format, with appropriate protections for the privacy rights of the disabled. 317.17~~

317.18 ~~***Action LU-3.4.C: Analysis of Group Home Siting Standards***~~

~~Conduct an analysis of the spatial standards currently used to regulate group homes and homeless shelters in the District, and determine if adjustments to these standards are needed to create additional siting opportunities. In addition, consider allowing group homes and homeless shelters in Zone Districts CM-1 and CM-2. 317.18~~

317.19 ~~***Action LU-3.4.D: Community Housing Ombudsman***~~

~~Establish an ombudsman position within the District of Columbia to serve as a resource for residents, neighborhood organizations and other stakeholders, government, and group home operators. The ombudsman would encourage educational efforts, enforcement of Fair Housing Act policy, and dispute resolution related to the siting and operations of group homes within the District. 317.19~~

**318 LU-3.5 FEDERAL FACILITIES 318**

318.1 When streets and highways are subtracted out, about one-third of the land area of the District of Columbia is owned by the federal government. Most of this land is managed by the National Park Service, but a significant amount—more than 2,700 acres—is comprised of federal installations, offices, military bases, and similar uses. This acreage includes nearly 2,000 buildings, with over 95 million square feet of floor space. Federal uses occupy a range of physical settings, from self-contained enclaves like ~~Bolling Air Force Base~~ **Joint Base**

## Draft Amendments

Anacostia-Bolling to grand office buildings in the heart of Downtown Washington. Federal uses operate in all quadrants of the city, often amidst residential neighborhoods. Since they are largely exempt from zoning, coordination and communication are particularly important to ensure land use compatibility. 318.1

318.2 Many of the District's federal uses have unique security requirements and operational needs. This became particularly apparent after 9/11, as streets around the US Capitol were permanently closed and major federal offices and monuments were retrofitted to improve security. Security needs are likely to create further changes to the District's landscape ~~in the future~~; the ~~recent proposal to ongoing~~ relocation of ~~e~~-thousands of Homeland Security workers to the west campus of St. Elizabeths Hospital is just one example. 318.2

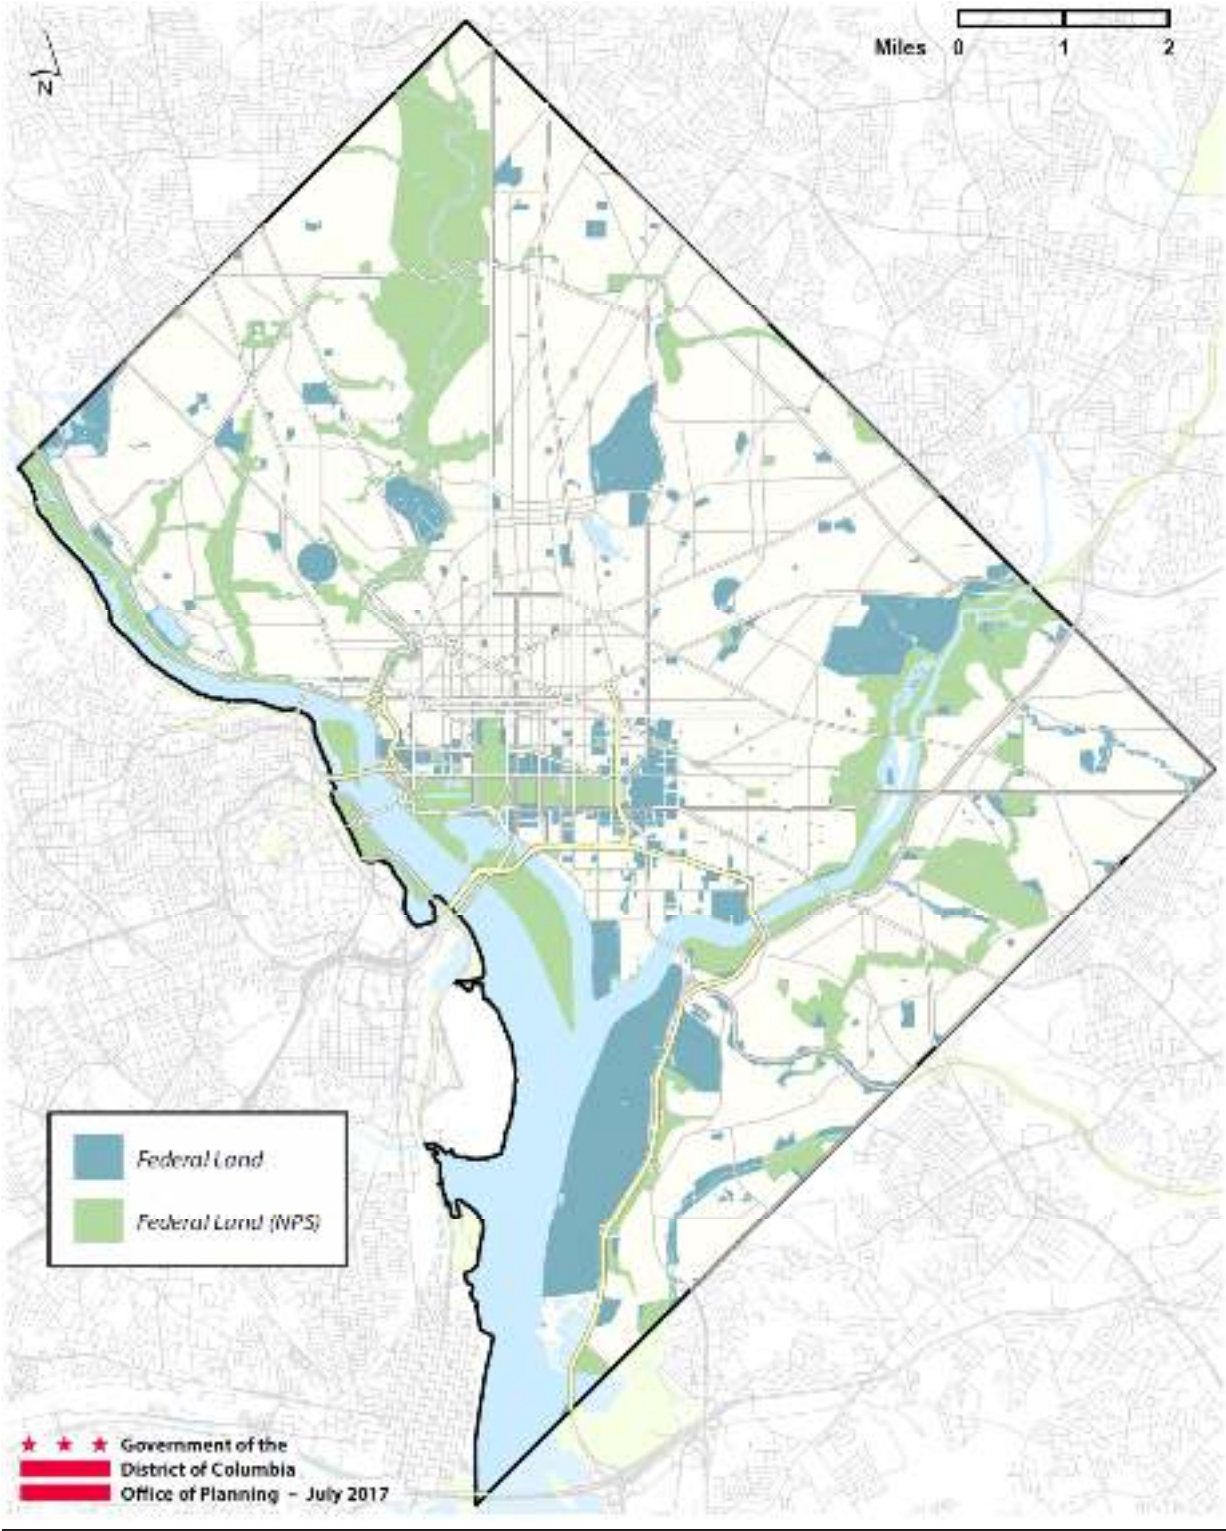

318.3 The size of the federal workforce in the District is ~~projected to increase~~ **not expected to grow** during the next decade, following more than ~~twenty-five o decades of~~ **years of** downsizing. The District supports ~~this increase, as well as~~ continued adherence to a 1968 federal policy to maintain 60 percent of the region's federal employees within the District of Columbia. At the same time, the federal government is in the process of transferring several tracts of land to the District, potentially reducing the land area for their expansion. This suggests the need for even greater coordination on the planning and development front. ~~in the future~~. Several successful joint planning efforts have recently been completed, including plans for the ~~South Capitol Street Corridor, the Southeast Federal Center, Armed Forces Retirement Home, Poplar Point, and the Anacostia Waterfront~~ **Walter Reed Army Medical Center**. Efforts like these must continue as the future of **the FBI and Labor Department buildings** ~~Walter Reed Army Medical Center, the Armed Forces Retirement Home~~, RFK Stadium, and other large federal sites is resolved. 318.3

318.4 Major federal activities in the District are shown on Map 3.8. Priorities for the use of these lands are expressed in the Federal Elements of the Comprehensive Plan. The "Federal Workplace" Element of that Plan includes policies to reinforce the preeminence of the monumental core through future siting decisions, give preference to urban and transit-served sites when siting new workplaces, and emphasize the modernization of existing structures before building new structures. The Federal Elements include guidelines on the types of federal functions that are appropriate within the Capitol Complex, the Central Employment Area, federal installations, and other areas within the District of Columbia, as well as elsewhere in the region. 318.4

Draft Amendments

318.5 Map 3.8: Federal Lands, ~~2005~~2017

## Draft Amendments

318.6 ***Policy LU-3.5.1: District/Federal Joint Planning***

Coordinate with the National Capital Planning Commission, the National Park Service, the General Services Administration, the Architect of the Capitol, and other federal agencies to address planning issues involving federal lands, including the monumental core, the waterfront, and the park and open space network. Encourage the use of master plans, created through participatory planning processes, to guide the use of large federal sites. 318.6

318.7 ***Policy LU-3.5.2: Federal Sites and Adjacent Neighborhoods***

Support expansion of the federal workforce and redevelopment of federal sites in a manner that is consistent with neighborhood revitalization, urban design, housing, economic development, ~~and~~ environmental quality, and socioeconomic equity goals. Federal land uses should strive to maintain land use compatibility with adjacent neighborhoods. 318.7

318.8 ***Policy LU-3.5.3: Recognition of Local Planning and Zoning Regulations***

Encourage the federal government to abide by local planning and zoning regulations to the maximum extent feasible. Where decisions require the input or actions of federal agencies, encourage swift decision-making so as not to delay achievement of local goals. 318.8

318.9 ***Policy LU-3.5.4: Federal Workplaces and District Goals***

Strongly support the implementation of Federal Element policies for federal workplaces calling for transportation demand management, sustainable design, energy conservation, additional workforce housing, and the creation of job opportunities in economically distressed communities within the District of Columbia. 318.9

318.10 ***Policy LU-3.5.5: Neighborhood Impact of Federal Security Measures***

Consistent with the Federal Elements, ensure that federal security measures do not impede the District's commerce and vitality, excessively restrict or impede the use of public space or streets, or impact the health of the existing landscape. Additional street closures are to be avoided to the maximum extent possible. 318.10

318.11 ***Policy LU-3.5.6: Reducing Exposure to Hazardous Materials***

Avoid locating and operating federal facilities that produce hazardous waste or that increase the threat of accidental or terrorist-related release of hazardous materials in heavily populated or environmentally sensitive areas. 318.11  
Actions relating to federal facility sites may be found in the Comprehensive Plan Area Elements.
